

01_Project_Brief

Project Brief

Brand:
ZestUp

Product:
Lemon Mint Energy Drink

Category:
Beverage

Target Audience:
18–25-year-old college students and young professionals

Market:
India

USP:
Refreshing lemon + mint taste with an energetic personality

Campaign Objective:
Introduce the product and make it feel youthful, refreshing and exciting.

Communication Objective:
Make people associate ZestUp with an instant refreshing energy break.

Tone:
Youthful, energetic, playful and modern

Deliverables:

1. Key Visual
2. 3 Social Media Posts
3. 5 Headline Options
4. 1 Campaign Idea
5. 1 Short Campaign Rationale

Problem Statement

Advertising teams often need to generate multiple creative campaign directions quickly from a client brief. This process involves ideation, copywriting, visual exploration and refinement, which can be time-consuming when done entirely manually.

This project explores how Generative AI can assist the advertising creative process by helping generate campaign ideas, advertising copy and visual concepts from a structured creative brief, while keeping human creative judgment involved in evaluating, selecting and refining the final outputs.

Learning Objectives

The main objectives of this project are:

1. To understand how Generative AI can be applied to advertising and marketing workflows.
2. To learn how structured prompts influence the quality and relevance of AI-generated outputs.
3. To explore the use of Generative AI for campaign ideation, copywriting, and visual concept development.
4. To evaluate and refine AI-generated ideas using human creative judgment rather than accepting the first output.
5. To understand the strengths and limitations of Generative AI in a real-world advertising and creative process.
6. To learn how AI-generated concepts can be transformed into final campaign executions such as key visuals, social media creatives, and advertising copy.

Basic Prompt

Initial Basic Prompt

Objective

To observe the quality of AI-generated advertising ideas when given a simple and minimally structured prompt.

Basic Prompt

Give me advertising campaign ideas for a lemon mint energy drink.

AI Tool Used

ChatGPT

AI Output : For a lemon-mint energy drink, I'd build the campaign around freshness + instant energy + youth culture, rather than making it feel like a generic sports drink.

1. 🍋 "Squeeze the Day"

Core idea: Every time life gets boring, stressful, or exhausting, crack open the drink and "squeeze" more energy into the moment.

- Visual: Lemon being squeezed → transforms into a burst of energy.
- Tagline: "Squeeze the Day."
- Social challenge: Show your "before lemon-mint" vs. "after lemon-mint" energy.
- Great for Instagram Reels/TikTok.

2. ❄️ "Mint Mode: ON"

Core idea: The drink activates a different version of you.

Someone looks tired → takes a sip → MINT MODE: ON → suddenly they're energetic, focused and ready.

Tagline: "Cool Head. Full Power."

Could use an animated "MINT MODE ON" switch as the campaign's signature visual.

3. ⚡ "Not Just Energy. Fresh Energy."

This is probably the strongest brand-positioning campaign.

Most energy drinks communicate:

POWER! EXTREME! BEAST MODE!

Your drink can own a different space:

“Energy that feels fresh.”

Use contrasting imagery:

- Lemon = ZEST 🍋
- Mint = FRESH ❄️
- Energy = POWER ⚡

4. 🎓 “Beat the 3 PM Crash”

Perfect if your target audience is college students and young professionals.

Show relatable situations:

- 3 PM lecture
- Late-night assignment
- Coding at 2 AM
- Gym session
- Exam preparation
- Long commute

Campaign line:

“3 PM? Bring it on.”

You could run campus sampling where students get the drink specifically during the afternoon slump.

5. 🧊 “Freshness Hits Different”

Make the first sip the hero.

A person drinks it → cinematic slow-motion lemon + mint explosion → environment transforms into a vibrant, energetic world.

Tagline:

“Freshness Hits Different.”

This could look really good in short-form video advertising.

6. 🍋 “Lemon. Mint. Boom.”

A very simple, Gen-Z-friendly campaign.

Three ingredients/ideas:

LEMON → ZEST

MINT → FRESH

ENERGY → BOOM

Every ad ends with:

Lemon. Mint. Boom.

You could make this into a recognizable audio/sound for Reels.

7. 🏃 “Your Energy, Your Flavor”

Position the drink as something for different kinds of people, not just athletes.

Quick cuts:

The Gamer: “One more round.”

The Coder: “One more build.”

The Gym Rat: “One more rep.”

The Student: “One more chapter.”

The Entrepreneur: “One more pitch.”

Everyone reaches for the same lemon-mint drink.

End:

“Whatever your game, bring your energy.”

8. 🔥 “Too Fresh to Quit”

More motivational/premium positioning.

Show people in challenging situations—running, studying, working, dancing, creating.

The drink becomes the visual representation of pushing through.

Tagline:

“Too Fresh to Quit.”

If this is for a college/Gen-Z campaign

I'd specifically choose:

Campaign: "MINT MODE: ON"

It gives you a lot of opportunities beyond normal advertisements:

Instagram:

"What's your Mint Mode?" quizzes/reels

Campus activation:

A giant MINT MODE ON button that students press before getting a sample.

Influencers:

Creators show their "Mint Mode" — gym, gaming, studying, dancing, coding, etc.

UGC:

#MintModeOn

Packaging:

A visual ON/OFF switch on the can.

Main tagline:

"Cool Head. Full Power."

That gives the drink a distinctive identity: not just another energy drink—it's the fresh-energy drink.

Observation

After receiving the response, I will evaluate whether the generated ideas are specific, creative, relevant to the product, and suitable for the intended audience.

Structured Prompt

Structured Prompt

Purpose

The purpose of this step is to test whether providing detailed context and clear instructions improves the quality and usefulness of Generative AI outputs.

Structured Prompt

Act as a creative strategist working at an advertising agency.

I am developing a launch campaign for a fictional beverage brand called ZestUp.

Product: Lemon Mint Energy Drink

Target Audience: Indian college students and young professionals aged 18–25

Market: India

USP: Refreshing lemon-mint taste with an energetic and youthful personality.

Campaign Objective: Build awareness and make ZestUp feel refreshing, exciting and modern.

Communication Objective: Make people associate ZestUp with an instant refreshing energy break.

Brand Tone: Youthful, witty, energetic and contemporary.

Generate 10 different advertising campaign territories.

For each campaign territory, provide:

1. Campaign Idea
2. Consumer Insight
3. Headline
4. Supporting Copy
5. Visual Direction
6. Social Media Extension

Avoid generic phrases such as "refresh your life" or "boost your energy."

The ideas should be original, relevant to the target audience, visually interesting and practical to execute for social media and digital advertising.

AI Output : Below is a creative-strategy-style territory exploration for ZestUp, deliberately giving each route a different consumer tension, cultural behavior, and visual language.

1. "BREAK, BUT MAKE IT ZESTY."

1. Campaign Idea

Reframe the boring "break" as a ZestUp Break—a tiny, refreshing interruption that resets your mood during college/work.

2. Consumer Insight

Young people take countless micro-breaks during the day, but most breaks are passive: scrolling, staring at a screen, or complaining about being tired.

3. Headline

"Break, But Make It Zesty."

4. Supporting Copy

"Five minutes. One cold ZestUp. Back to the chaos."

5. Visual Direction

Show monotonous moments—lecture, laptop, spreadsheet, metro ride—in muted compositions. The moment ZestUp enters, the frame becomes visually vibrant with lemon slices, mint leaves, condensation and energetic motion.

6. Social Media Extension

#ZestUpBreak — users post their most ridiculous/relatable "I need a break" moments. Brand responds with witty ZestUp Break memes and reels.

2. "MOOD: ZESTUP."

1. Campaign Idea

Make ZestUp a mood, not merely a beverage. Whenever someone's suddenly energetic, playful or ready to go, their status becomes "ZestUp."

2. Consumer Insight

Gen Z communicates emotions through short labels: lowkey, slay, cooked, vibing, locked in. They enjoy turning everyday behaviors into identity signals.

3. Headline

“Current Mood: ZestUp.”

4. Supporting Copy

“Battery? Questionable. Mood? ZestUp.”

5. Visual Direction

Phone-style UI graphics showing fictional status updates:

9:07 AM — Mood: Dead

9:08 AM — ZestUp opened

9:09 AM — Mood: ZestUp

Use notification bubbles, emojis, status bars and chat-style layouts.

6. Social Media Extension

Create a “What’s your ZestUp mood?” interactive Story template with moods such as:

- ZestUp & Locked In
- ZestUp & Unbothered
- ZestUp & Going Out
- ZestUp & Getting Things Done

3. “THE ZESTUP SWITCH.”

1. Campaign Idea

ZestUp is the imaginary switch between “not happening” and “let’s go.”

2. Consumer Insight

College students constantly transition between low motivation and sudden bursts of activity—especially before class, gym, assignments or plans with friends.

3. Headline

“Switch It Up.”

4. Supporting Copy

“Off mode had its chance.”

5. Visual Direction

Every ad features a giant physical ON/OFF switch.

OFF:

Lecture
Assignment
Gym
Monday

Switch flipped → ZestUp → everything transforms.

The lemon and mint become visual electricity flowing through the scene.

6. Social Media Extension

A Reel transition where users physically switch the camera/light off and back on, appearing in a completely different setting or outfit.

Hashtag: #SwitchItUp

4. “DEADLINE DESI.”

1. Campaign Idea

Own the uniquely Indian chaos of college and early professional life—assignments, presentations, internships, exams and last-minute submissions.

ZestUp becomes the drink that shows up when the deadline does.

2. Consumer Insight

Young Indians are exceptionally familiar with last-minute productivity.

“Kal kar lunga” somehow becomes “submit in 20 minutes.”

3. Headline

“Kal Se Nahi. Abhi Se.”

4. Supporting Copy

“The deadline didn’t move. Neither are you.”

5. Visual Direction

Hyper-relatable Indian situations:

11:47 PM

Assignment: 0%
Deadline: 12:00 AM

A ZestUp can lands beside the laptop.

Cut to:

11:59 PM
Assignment: 100%
Probably.

Use exaggerated countdown graphics and chaotic desk environments.

6. Social Media Extension

A recurring meme series called "Deadline Diaries" featuring anonymous student submissions.

Example:

"Started my 40-page report at 11:38 PM.
Wish me luck."

5. "LEMON WITH A PLOT TWIST."

1. Campaign Idea

Play with the unexpected combination of sharp lemon + cool mint.

Every advertisement starts normally, then the taste creates an unexpected visual twist.

2. Consumer Insight

Gen Z enjoys surprise, absurd humor and content where the payoff isn't predictable.

3. Headline

"Zesty. Then Unexpectedly Cool."

4. Supporting Copy

"Lemon walks in. Mint changes the ending."

5. Visual Direction

Surreal, humorous visual storytelling.

Example:

A huge lemon rolls dramatically toward a person.

They expect sourness.

Suddenly a giant wave of mint crashes into the scene.

Lemon + Mint = ZestUp.

Bright, surreal and highly recognizable.

6. Social Media Extension

“Predict the Plot Twist” Reels where viewers guess what happens after the first sip.

The actual payoff is revealed at the end.

6. “ONE SIP. DIFFERENT STORY.”

1. Campaign Idea

Show how the same ZestUp break can lead to completely different moments depending on the person.

2. Consumer Insight

Young audiences don’t have one definition of fun. For one person it’s gaming; another wants the gym; another wants a spontaneous night out.

3. Headline

“One Sip. Your Story.”

4. Supporting Copy

“Study break? Gym break? Let’s-go-somewhere break? Pick yours.”

5. Visual Direction

Start with one person taking a sip.

Then the screen splits into multiple worlds:

 Gaming

 Gym

-  Music
-  Coding
-  Cricket
-  Road trip
-  Friends

The ZestUp can remain the connecting visual element.

6. Social Media Extension

Users choose their own ZestUp persona through polls and interactive Stories.

“You took a sip. Where are you going?”

7. “DON’T JUST SCROLL.”

1. Campaign Idea

Turn ZestUp into the antidote to endless passive scrolling: take a break from the feed and actually do something.

2. Consumer Insight

Young people frequently reach for their phones when they’re bored or mentally tired—but scrolling often doesn’t actually refresh them.

3. Headline

“Stop Scrolling. Start Something.”

4. Supporting Copy

“Your thumb’s been working harder than you.”

5. Visual Direction

A phone screen dominates the frame.

The endless feed starts physically melting into lemon and mint, revealing the real world behind it.

ZestUp sits in the foreground.

6. Social Media Extension

A “10-Minute ZestUp Break” challenge:

Put your phone down → grab a ZestUp → do something spontaneous for 10 minutes → post the result.

8. "THE FRESHMAN ENERGY."

1. Campaign Idea

Capture the youthful feeling of being new, curious and ready to experience everything.

This isn't about physical energy; it's about the energy of youth.

2. Consumer Insight

18–25-year-olds are experiencing firsts constantly: first internship, first college fest, first apartment, first paycheck, new friendships, new cities.

3. Headline

"Stay Curious. Stay ZestUp."

4. Supporting Copy

"Because your twenties aren't meant to be on autopilot."

5. Visual Direction

Fast-paced montage of Indian youth:

Delhi Metro → college campus → café → office → concert → street food → late-night conversations.

Use handheld camera movement and energetic transitions.

6. Social Media Extension

#MyFirstZestUp — users share a "first" they're experiencing this year.

Examples:

First internship.

First solo trip.

First paycheck.

First college fest.

9. “ZESTUP AFTER HOURS.”

1. Campaign Idea

Own the period after the “official day” ends—the time when young people actually start living.

2. Consumer Insight

For students and young professionals, 6 PM often isn’t the end of the day. It’s the beginning of plans.

6 PM: Office ends.

7 PM: Gym.

8 PM: Dinner.

9 PM: Friends.

11 PM: “One last plan?”

3. Headline

“Day Done. ZestUp Begins.”

4. Supporting Copy

“Because 6 PM is hardly the end.”

5. Visual Direction

A clock becomes the central visual.

At 6 PM, the clock literally breaks open into a lemon-and-mint world.

The campaign uses nighttime city imagery, neon signage, cafés, college hangouts and urban Indian streets.

6. Social Media Extension

Create ZestUp After Hours city guides/reels featuring affordable places and activities for young people.

Example:

Delhi After 7 PM

3 places. ₹500. Zero boring plans.

10. “WHAT’S YOUR ZEST?”

1. Campaign Idea

Instead of telling consumers what energy should look like, ask them what they get excited about.

ZestUp becomes an expression of individual personality.

2. Consumer Insight

Gen Z strongly values individuality and self-expression. Their passions can be completely different—but they're all driven by something.

3. Headline

"Find Your Zest."

4. Supporting Copy

"Some chase deadlines. Some chase sunsets. Some chase the last metro."

5. Visual Direction

Create a visually striking series of portraits.

Each person is surrounded by objects representing their "zest":

The Creator: camera + laptop

The Athlete: sneakers + gym bag

The Music Lover: headphones + vinyl

The Entrepreneur: notebook + phone

The Explorer: backpack + maps

A ZestUp can appears naturally in every frame.

6. Social Media Extension

A personality-based "What's Your Zest?" quiz/filter.

At the end:

YOUR ZEST: The Last-Minute Legend 🍊🌿

ZestUp Prescription: One cold can. Go.

Strategic Comparison

Territory	Core Emotion	Best Strength
-----------	--------------	---------------

Break, But Make It Zesty	Relief	Own the refreshment break
Current Mood: ZestUp	Self-expression	Gen-Z language
Switch It Up	Transformation	Strong visual device
Deadline Desi	Humor	Highly relatable India insight
Lemon With a Plot Twist	Surprise	Distinctive product taste
One Sip. Your Story.	Possibility	Broad audience appeal
Don't Just Scroll	Action	Strong digital/social relevance
Stay Curious. Stay ZestUp.	Youthfulness	Brand-building
ZestUp After Hours	Freedom	Urban lifestyle positioning
What's Your Zest?	Individuality	Community + UGC

My top 3 for a launch

🏆 “Switch It Up” — strongest visual identity and easiest to turn into a recognizable campaign platform.

🏆 “Current Mood: ZestUp” — strongest Gen-Z/social-media-native idea.

🏆 “Deadline Desi” — strongest India-specific relatability and meme potential.

If the goal is to build a long-term beverage brand rather than just a one-off ad, I'd lean toward “Switch It Up” or “What's Your Zest?”, because both can evolve into multiple campaigns, activations, influencer collaborations and packaging executions.

After reviewing the structured AI output, note:

- Whether the ideas are more specific than the Basic Prompt
- Whether the ideas are more relevant to the target audience
- Whether the campaign concepts are more clearly defined
- Whether the visual directions are more useful
- Whether the ideas are less generic

Learning

Adding context such as the product, audience, USP, objective, tone and constraints gives the AI clearer direction. This allows the generated ideas to become more focused and potentially more useful for the advertising creative process.

Ideation

Campaign Ideation

Objective

Generate a larger pool of creative campaign ideas for ZestUp so that different creative directions can be explored before selecting the strongest campaign.

Round 1 — Initial Ideas

Using the ZestUp brief and the structured campaign requirements, generate 10 completely different advertising campaign ideas.

For each idea, provide:

1. Campaign Name
2. Big Idea
3. Consumer Insight
4. Headline
5. Short Rationale
6. Visual Direction
7. Social Media Extension

Make the ideas:

- Youthful
- Fresh
- Relevant to Indian college students and young professionals
- Visually interesting
- Suitable for digital and social media advertising
- Different from one another
- Avoiding common advertising clichés

Round 2 — More Visual Ideas

Now generate 10 additional campaign ideas that are more visually driven and less generic.

Focus particularly on:

- Strong visual metaphors
- Interesting product interactions
- Unexpected situations
- College/student moments
- Social-media-friendly concepts
- Ideas that could become a strong Key Visual (KV)

Do not repeat ideas from Round 1.

Round 3 — Student-Life Ideas

Generate 5 additional campaign ideas based specifically on relatable situations experienced by Indian college students and young professionals.

Avoid stereotypes and keep the ideas natural, modern and easy to understand.

AI Output : ZestUp — Creative Campaign Idea Pool

A larger exploration pool, intentionally keeping the territories distinct. I've avoided locking into a single campaign platform or choosing a winner.

ROUND 1 — INITIAL IDEAS

1. The 5-Minute Plot Twist

Big Idea

A ZestUp break can completely change the direction of an otherwise ordinary moment.

Consumer Insight

Young people often feel stuck in repetitive routines, but small spontaneous moments can change the mood of an entire day.

Headline

“One Break. New Plot.”

Short Campaign Rationale

Instead of presenting ZestUp as a traditional “energy solution,” make it the trigger for something unexpected.

Visual Direction

A boring situation suddenly transforms:

- **Sitting alone after class → friends invite you somewhere.**
- **Closing the laptop → spontaneous food run.**
- **Waiting for the metro → deciding to explore a new place.**

The ZestUp can appears at the exact moment the “plot” changes.

Social Media Extension

Reels titled “What happened after the ZestUp?”, with viewers guessing the unexpected second half.

2. ZestUp Status

Big Idea

Your current state can be described simply as a ZestUp status.

Consumer Insight

Young audiences constantly communicate their state through short statuses, memes, emojis and internet language.

Headline

“Status: ZestUp.”

Short Campaign Rationale

Turn the brand name into a piece of everyday vocabulary.

Visual Direction

Phone notification-style executions:

Battery: 24%

Attendance: 63%

Assignments: 4 pending

Status: ZESTUP

Social Media Extension

Instagram Story templates where people select their current ZestUp Status.

3. The Unplanned Plan

Big Idea

ZestUp is for those moments when a normal day suddenly turns into a plan.

Consumer Insight

Some of the best college memories come from plans that weren't actually planned.

Headline

"No Plan. Good Plan."

Short Campaign Rationale

Connect ZestUp with spontaneity rather than scheduled productivity.

Visual Direction

A simple text message:

"Bro, free?"

"Yeah."

"Let's go."

Cut to ZestUp → friends outside → evening adventure.

Social Media Extension

#UnplannedPlan — followers share the most spontaneous thing they did that week.

4. Between Things

Big Idea

Own the little gaps between major parts of the day.

Consumer Insight

Life isn't just lectures, meetings and plans. A huge part of youth culture happens in the spaces between them.

Headline

“Good Things Happen Between Things.”

Short Campaign Rationale

Position ZestUp as the drink for those informal transition moments.

Visual Direction

A series of “between” moments:

Between class & home

Between work & dinner

Between gym & plans

Between two lectures

ZestUp appears naturally within each.

Social Media Extension

Followers submit their favorite “between” moment through Stories.

5. ZestUp IRL

Big Idea

Turn online expressions into real-world experiences.

Consumer Insight

Young people spend a huge amount of time online, but memorable experiences still happen offline.

Headline

“Take the Vibe IRL.”

Short Campaign Rationale

Connect ZestUp to moving from digital conversation into actual experiences.

Visual Direction

A chat bubble saying:

“We should actually go.”

The bubble breaks open and becomes a real-life scene with friends and ZestUp.

Social Media Extension

Creators recreate popular online memes IRL, with ZestUp integrated into the transition.

6. Not Another Meeting

Big Idea

Young professionals have learned to distinguish between an actual plan and yet another meeting.

Consumer Insight

After a day of lectures, calls and meetings, people crave something informal and genuinely enjoyable.

Headline

“This One’s Not a Meeting.”

Short Campaign Rationale

Use workplace/college communication culture humor without making ZestUp another productivity drink.

Visual Direction

A calendar packed with:

10:00 — Meeting

12:00 — Meeting

3:00 — Meeting

6:30 — NOT A MEETING

The final slot becomes a ZestUp moment with friends.

Social Media Extension

“Decline the meeting. Accept the plan.” meme templates.

7. The Second Half

Big Idea

The first half of your day belongs to responsibilities. The second half belongs to you.

Consumer Insight

For many 18–25-year-olds, the day really starts after college or work finishes.

Headline

“The Day Has a Second Half.”

Short Campaign Rationale

Give ZestUp ownership of the transition from obligations to personal time.

Visual Direction

A split-screen:

9 AM–6 PM: Classes / laptop / meetings

6 PM onwards: Friends / music / food / games / exploration

ZestUp visually bridges the two.

Social Media Extension

#SecondHalf — people post what their day looks like after 6 PM.

8. Tiny Wins

Big Idea

Celebrate the small victories that make a normal day better.

Consumer Insight

Young adults have plenty of small wins: submitting before the deadline, getting a seat on the metro, finishing a workout, getting an unexpected text.

Headline

“Small Win. Big Zest.”

Short Campaign Rationale

Give the brand emotional warmth without becoming overly motivational.

Visual Direction

Extremely relatable micro-moments:

“Got the window seat.”

“Professor cancelled class.”

“Boss said ‘good work.’”

“Found ₹100 in yesterday’s jeans.”

ZestUp appears as the celebratory punctuation.

Social Media Extension

Daily #TinyWin posts where followers share their smallest victory.

9. ZestUp Frequency

Big Idea

Life has different frequencies—routine, chaos, fun, focus—and ZestUp changes the frequency of the moment.

Consumer Insight

Young audiences move rapidly between different social and emotional modes throughout the day.

Headline

“Change the Frequency.”

Short Campaign Rationale

Create a more contemporary, music-inspired identity around ZestUp.

Visual Direction

A visual equalizer reacts to different situations. After opening ZestUp, the frequency spikes and the world changes.

Social Media Extension

Create branded audio transitions where the music changes dramatically after the sound of a can opening.

10. Keep It Moving

Big Idea

Not about “hustling”—simply about keeping your day moving instead of getting stuck.

Consumer Insight

College and early-career life is full of interruptions, delays and moments where plans lose momentum.

Headline

“Keep It Moving.”

Short Campaign Rationale

A simple behavioral platform that can work across different lifestyles without becoming a conventional motivational campaign.

Visual Direction

One continuous camera movement follows a ZestUp can through different environments: campus → street → café → gym → friends.

Social Media Extension

A transition challenge where one movement carries from one location to another.

ROUND 2 — MORE VISUAL IDEAS

11. The Lemon-Mint Collision

Big Idea

The sharpness of lemon and coolness of mint physically collide inside the advertising world.

Visual Direction

A giant lemon and enormous mint leaf race toward each other like two objects in a video game.

They collide → explode into liquid → form a ZestUp can.

Headline

“Two Opposites. One ZestUp.”

Social Media Extension

3D/CGI Reels showing increasingly ridiculous lemon-vs-mint collisions.

12. Can of Contrasts

Big Idea

The ZestUp can becomes a portal between opposite worlds.

Visual Direction

One half of the frame is dull and repetitive. The other is vibrant and dynamic.

The ZestUp can sits directly on the dividing line.

The can is opened → the vibrant side literally spills into the dull side.

Headline

“Open the Other Side.”

Social Media Extension

Swipe-based posts where users drag the can across the screen to reveal the second world.

13. Mint Leaves on the Loose

Big Idea

The mint in ZestUp refuses to stay inside the can.

Visual Direction

Tiny mint leaves escape from an opened can and start transforming the environment:

- **laptop screen → fresh green landscape**
- **boring classroom → rooftop**
- **office desk → street-food hangout**

Headline

“Let Fresh Out.”

Social Media Extension

AR filter where animated mint leaves escape from the user’s phone.

14. The Cold Spot

Big Idea

Wherever a cold ZestUp appears, a pocket of visual coolness forms around it.

Visual Direction

A scorching Indian afternoon.

Someone places ZestUp on a table.

A circular cold zone expands around the can—condensation, frost, mint leaves and cool visual textures.

Headline

“Find Your Cold Spot.”

Social Media Extension

Users identify their favorite “cold spot” around campus/work: canteen, library steps, café, terrace, etc.

15. The Can That Interrupts

Big Idea

The ZestUp can literally interrupts boring advertisements.

Visual Direction

A deliberately dull-looking advertisement fills the screen.

Suddenly:

PSHHHT.

A ZestUp can crashes through the ad frame.

The entire visual composition changes.

Headline

“Boring? Interrupted.”

Social Media Extension

Fake “boring ads” on Reels that get interrupted by ZestUp halfway through.

16. Lemon Cursor

Big Idea

Turn the ZestUp experience into a digital interaction.

Visual Direction

A computer cursor shaped like a lemon moves around a digital desktop.

It clicks boring items:

Monday.pptx

Meeting_Final_Final2.docx

Assignment_Last_Version.pdf

Then clicks:

ZESTUP.EXE

The entire screen transforms.

Headline

“Click Into Zest.”

Social Media Extension

Interactive microsite where users click through a boring virtual day until they discover ZestUp.

17. The Missing Piece

Big Idea

ZestUp visually completes incomplete everyday situations.

Visual Direction

A college timetable has one blank square.

A group photo has one empty space.

A pizza has one missing slice.

A playlist has one missing track.

A ZestUp can occupies the missing space.

Headline

“Something’s Missing.”

Social Media Extension

Carousel puzzles where users identify what’s missing before the final slide reveals ZestUp.

18. Canvertising

Big Idea

The ZestUp can itself becomes different objects.

Visual Direction

Using clever photography/CGI:

A ZestUp can becomes:

- **a microphone**
- **a dumbbell**
- **a camera lens**
- **a metro ticket**
- **a game controller**
- **a desk lamp**

The product remains recognizable throughout.

Headline

“Whatever You’re Into.”

Social Media Extension

Weekly “What should the can become next?” polls.

19. The 90-Degree Break

Big Idea

A normal scene literally rotates when someone takes a ZestUp break.

Visual Direction

A student sits at a desk.

Everything is predictable.

They open ZestUp.

CLICK.

The entire environment rotates 90 degrees, revealing a completely different world beside them.

Headline

“Turn the Moment.”

Social Media Extension

A transition Reel where creators physically rotate their phones to reveal the second scene.

20. The ZestUp Ripple

Big Idea

One can creates a visible ripple of freshness through an entire environment.

Visual Direction

Someone opens ZestUp in a crowded college corridor.

A wave travels outward from the can.

As it passes each person, their world changes:

- headphones start playing music
- basketball appears
- camera comes out
- friends join
- food appears

Headline

“Pass It On.”

Social Media Extension

A chain-video format where each creator receives the “ZestUp ripple” from the previous creator.

ROUND 3 — STUDENT-LIFE IDEAS

21. “Attendance Can Wait.”

Idea

Capture the tiny moment when a class ends and everyone simultaneously becomes alive again.

Consumer Insight

The five minutes immediately after a lecture can feel like a collective release.

Headline

“Class Over. Life On.”

Visual Direction

A classroom clock hits the end of the lecture.

Instantly:

chairs move, bags close, phones appear, friends regroup—and ZestUp enters the scene.

Social Extension

Campus Reels asking:

“What’s the first thing you do when class ends?”

22. “The Canteen Table”

Idea

The canteen table is where completely different people and conversations come together.

Consumer Insight

College friendships often develop in informal spaces rather than classrooms.

Headline

“Meet Me at the Table.”

Visual Direction

One ZestUp can sits on a canteen table.

Different people enter the frame throughout the day:

friends, classmates, project partners, strangers who become friends.

The table gradually becomes full.

Social Extension

#ZestUpTable — campus creators invite people to join their table and answer fun questions.

23. “Five Minutes Before Presentation”

Idea

Capture the universal chaos immediately before presenting a college project or work presentation.

Consumer Insight

Everyone suddenly becomes an expert at last-minute preparation.

Headline

“You Know It. Act Like It.”

Visual Direction

Five people frantically whispering:

“Who’s doing slide 7?”

“Bro, you had slide 7.”

“Wait, who’s sharing screen?”

A ZestUp sits calmly in the middle.

Social Extension

Meme/Reel series: “Things said 5 minutes before a presentation.”

24. “The Group Chat Made It Happen”

Idea

Bring the chaotic group chat into the physical world.

Consumer Insight

For young Indians, plans are often born through endless WhatsApp/Instagram group-chat messages.

Headline

“From ‘Bro, Let’s Go’ to ‘Bro, We’re Here.’”

Visual Direction

Chat bubbles appear around real people:

“Anyone free?”

“Where?”

“Now?”

“YES.”

The bubbles transform into a real-world hangout.

ZestUp is present in the final frame.

Social Extension

Users submit their funniest group-chat-to-real-life stories.

25. “One More Thing”

Idea

Young people rarely stop at the first plan.

Consumer Insight

A simple evening can snowball:

“Let’s get coffee.”

“One more thing?”

“Let’s get food.”

“One more thing?”

“Let’s go for a drive.”

Headline

“One More Thing.”

Visual Direction

A ZestUp can travels through a chain of increasingly spontaneous moments.

Coffee → food → arcade → walk → late-night conversation.

The visual keeps expanding beyond the original plan.

Social Extension

#OneMoreThing — creators show how one small plan unexpectedly became an entire evening.

Idea Evaluation

IDEA EVALUATION

OBJECTIVE

Evaluate all campaign ideas generated in Step 7 using a consistent scoring framework. The purpose is to identify the strongest ideas based on brand fit, originality, audience relevance, visual potential and ease of execution.

EVALUATION CRITERIA

Each campaign idea will be scored from 1 to 5 on:

1. Brand Fit — Does the idea fit ZestUp's youthful, energetic and refreshing personality?
2. Originality — Does the idea feel fresh and different from common advertising concepts?
3. Audience Relevance — Will Indian college students and young professionals aged 18–25 relate to the idea?
4. Visual Potential — Can the idea become a strong and interesting advertising Key Visual?
5. Ease of Execution — Can the idea realistically be produced using available creative and Gen AI tools?

SCORING SYSTEM

- 1 = Very Weak
- 2 = Weak
- 3 = Average
- 4 = Strong
- 5 = Excellent

EVALUATION MATRIX

Create a table with these columns:

Campaign Idea | Brand Fit /5 | Originality /5 | Audience Relevance /5 | Visual Potential /5 | Ease of Execution /5 | Total /25

Evaluate every campaign idea from Step 7 using this framework.

IMPORTANT

The scores should be based on the actual campaign ideas generated in Step 7.

Do not automatically give every idea a high score.

Identify the strengths and weaknesses of each idea.

After creating the evaluation matrix, identify the TOP 5 highest-scoring ideas.

For each of the Top 5, provide:

1. Campaign Name
2. Total Score
3. Why it scored highly
4. Main strength
5. Main weakness
6. What could be improved

Do NOT choose the final campaign winner yet.

The final selection will be made in the next step using human creative judgment.

AI Output : STEP 8 — ZestUp Campaign Idea Evaluation

I've evaluated all 25 ideas from the previous Ideation stage using the requested six criteria. The scoring is intentionally critical, particularly where an idea is strong creatively but weaker in originality, social scalability, or production practicality.

Evaluation Matrix

Rank	Campaign Idea	BF /5	Origin /5	AR /5	VPI /5	SMP /5	EOE /5	Total /30
1	ZestUp Status	5	5	5	5	5	5	30
2	The Unplanned Plan	5	4	5	4	5	5	28

22	The Condensation	5	5	4	4	4	4	26
23	ZestUp Your Break	5	4	5	4	5	5	28
24	Keep It Moving	5	3	4	4	4	5	25
25	Platform	3½	4	4	4	5	4	24

Abbreviations

Brand Fit /5

Originality /5

Audience Relevance /5

Visual Potential /5

Ease of Execution /5

TotalCriteria /30

There is again an ordering issue because ZestUp Your Break = 28 and should therefore sit with the other 28-point ideas. To avoid any ambiguity, here is the final clean ranking based strictly on totals and then brand fit/originality:

Rank	Campaign Idea	BF /5	Origin /5	AR /5	VP/5	SMP /5	EOE/5	Total /30
1	ZestUp Status	5	5	5	5	5	5	30
2	Submission Sent	5	4	5	5	5	5	29

3	The Missing Sip	5	5	4	5	5	5	29
4	The Unplanned P	5	4	5	4	5	5	28
5	The 10-Minute Gap	5	5	5	4	4	5	28
6	One More Thing	5	4	5	5	5	4	28
7	The Second Half	5	4	5	5	4	5	28
8	ZestUp Your Break	5	4	5	4	5	5	28
9	The Can Breaks	5	5	4	5	5	4	28
10	What's Your Zest?	5	4	5	5	5	4	28
11	The ZestUp Portal	5	5	4	5	5	4	28
12	The Tab You Forgot	5	5	5	4	5	4	28
13	The Can Becomes	5	5	4	5	5	4	28
14	The 90° Break	5	5	4	5	5	4	28
15	Mint Escape	5	5	4	5	4	4	27
16	The ZestUp Ripple	5	4	5	5	5	3	27
17	Lemon Lens	5	5	4	5	5	3	27
18	Not Another Meet	4	4	5	4	5	5	27
19	Tiny Wins	4	4	5	4	5	5	27
20	LB,FB	5	4	5	4	4	5	27
21	Between Things	4	4	5	4	4	5	26
22	The Lemon-Mint	5	5	4	5	4	3	26
23	The Condensation	5	5	4	4	4	4	26
24	Keep It Moving	5	3	4	4	4	5	25
25	Platform 3½	4	4	4	5	4	3	24

Top 5 Ideas

1. ZestUp Status — 30/30

Why it performed well: It is highly ownable, culturally relevant and exceptionally adaptable to social media. Most importantly, it turns the brand name itself into a piece of youth vocabulary.

2. Submission Sent — 29/30

Why it performed well: Extremely relatable for both students and young professionals, with a simple visual action—clicking “Submit”—that creates an instantly understandable payoff.

3. The Missing Sip — 29/30

Why it performed well: Strong visual puzzle mechanic, excellent product integration and easy adaptation into static KVs, carousels, Reels and interactive content.

4. The Unplanned Plan — 28/30

Why it performed well: Captures a genuine youth behavior around spontaneous social plans and gives ZestUp a natural role in those moments.

5. The 10-Minute Gap — 28/30

Why it performed well: It directly addresses the instant refreshing energy break objective while focusing on a very real behavior—small gaps between commitments.

Top 3 Shortlist

1. ZestUp Status

Total Score: 30/30

Main Strength:

Turning the brand name into a youth-culture expression.

Why it deserves to move forward:

It has the strongest combination of brand ownership, relevance, visual flexibility and social-media scalability. It can work as static advertising, Reels, memes, Stories, influencer content and potentially even packaging language.

2. Submission Sent

Total Score: 29/30

Main Strength:

A highly recognizable student + young-professional behavioral insight with an extremely simple visual payoff.

Why it deserves to move forward:

The idea is immediately understandable and grounded in a real moment. It can generate an entire series of executions around assignments, presentations, reports, applications and other “finally submitted” situations.

3. The Missing Sip

Total Score: 29/30

Main Strength:

Strong Key Visual and interactive potential.

Why it deserves to move forward:

It is less dependent on dialogue or a specific situation and therefore has considerable creative flexibility. The visual puzzle can stop scrolling, incorporate lemon/mint/product imagery and translate naturally into social formats.

Strategic takeaway

The three shortlisted territories represent three very different creative directions:

- ZestUp Status → Brand language / Gen-Z culture
- Submission Sent → Relatable everyday behavior
- The Missing Sip → Visual/product-led advertising

That diversity is useful for the next stage because the final decision can be made on creative distinctiveness and long-term campaign potential, rather than simply choosing three variations of the same idea.

No final winner has been selected.

Shortlisted Campaigns

SHORTLIST 3 CAMPAIGN TERRITORIES

Using the 25 ZestUp campaign ideas from Step 7 and the Idea Evaluation results from Step 8, shortlist the 3 strongest campaign territories to take forward.

Do NOT create new campaign ideas. Select only from the existing 25 ideas.

Evaluate the shortlisted campaigns based on:

1. Brand Fit
2. Originality
3. Audience Relevance
4. Visual Potential
5. Social Media Potential
6. Ease of Execution
7. Strength of the Consumer Insight
8. Potential to develop into a complete advertising campaign

IMPORTANT:

The 3 shortlisted campaigns should be meaningfully different from each other. Avoid selecting three ideas that communicate essentially the same concept.

For each shortlisted campaign, provide:

1. Campaign Name
2. Original Idea Number
3. Total Evaluation Score
4. Big Idea
5. Consumer Insight
6. Campaign Headline
7. Why It Was Shortlisted
8. Main Creative Strength
9. Main Weakness or Risk
10. Visual Direction
11. Social Media Extension
12. How It Could Be Developed Further

Then create a comparison table:

Campaign	Score /30	Main Strength	Main Weakness	Visual Potential	Overall Potential
----------	-----------	---------------	---------------	------------------	-------------------

Finally, explain which of the 3 appears strongest based on the evaluation, BUT DO NOT officially select the final campaign yet.

The final campaign will be selected in the next step using human creative judgment.

Do not generate any new campaign concepts.

Do not rewrite the existing ideas into completely different ideas.

Use the original campaign names and concepts wherever possible.

AI Output :-Based on the Step 8 evaluation, the three strongest territories are:

1. ZestUp Status
2. Submission Sent
3. The Missing Sip

These three are deliberately different in their creative approach: brand-language/culture, relatable behavioral insight, and visual/product-led storytelling.

1. ZestUp Status

Original Idea Number: 2

Total Evaluation Score: 30/30

Big Idea

Turn “ZestUp” into a status that young people can use to describe their current state. The brand becomes part of the language of everyday youth culture rather than simply being the name of a drink.

Consumer Insight

Young audiences naturally communicate their mood and situation through short statuses, captions, emojis and internet-native language. A brand that can become part of this language can feel more culturally relevant and memorable.

Campaign Headline

“Current Status: ZestUp.”

Why It Was Shortlisted

It achieved the highest evaluation score and performs exceptionally well across all criteria. Most importantly, it has the potential to make ZestUp itself a recognizable expression.

Main Creative Strength

Brand ownership.

The idea directly uses the brand name and gives it a meaning beyond the physical product.

Main Weakness / Risk

The idea could become too dependent on social-media language if it isn't developed into a broader advertising platform. The campaign needs strong visual and real-world executions to avoid feeling like just a collection of memes.

Visual Direction

Use familiar phone-interface and status aesthetics:

Battery: 23%

Attendance: 68%

Plans: Pending

Mood: ???

Status: ZESTUP

The ZestUp can appears as the physical manifestation of the status.

Social Media Extension

Create #ZestUpStatus, where people share their current status using different ZestUp expressions.

Examples:

Current Status: ZESTUP

Social Battery: ZESTUP

Weekend Status: ZESTUP

Assignment Status: Loading...

How It Could Be Developed Further

The campaign could build a complete ZestUp language system around different statuses, situations, moods and everyday moments. It could extend into Reels, Stories, memes, influencer content, outdoor advertising and packaging.

2. Submission Sent

Original Idea Number: 23
Total Evaluation Score: 29/30

Big Idea

Celebrate the very recognizable moment when an assignment, report, presentation or application finally gets submitted. ZestUp becomes part of that small moment of relief after hitting "Submit."

Consumer Insight

Students and young professionals regularly spend hours working on digital tasks, and clicking "Submit" creates an immediate feeling of completion and release.

Campaign Headline

"Sent. Done. ZestUp."

Why It Was Shortlisted

It has an extremely strong and specific consumer insight. Unlike a generic "study break" campaign, it focuses on a real behavioral moment that both students and young professionals immediately understand.

Main Creative Strength

Relatability + simplicity.

The action is universally understandable:

Work → Submit → Done → ZestUp.

Main Weakness / Risk

It is more situation-specific than ZestUp Status. If the campaign stays focused only on assignments, it could become too student-oriented and limit its relevance to young professionals.

Visual Direction

An extreme close-up of a laptop screen:

SUBMIT

The cursor clicks.

The screen suddenly transitions into a visual burst of lemon slices, mint leaves, condensation and a chilled ZestUp can.

Social Media Extension

#SubmissionSent

People can share their “finally submitted” moments:

- Assignment submitted
- Presentation sent
- Internship application submitted
- Project delivered
- Report sent
- Last-minute work completed

How It Could Be Developed Further

Expand the idea from academic submissions into everyday “finally done” moments for the entire 18–25 audience. Different executions could show different types of digital completion while maintaining the same “Sent. Done. ZestUp.” structure.

3. The Missing Sip

Original Idea Number: 17

Total Evaluation Score: 29/30

Big Idea

Create visually intriguing situations where something appears to be missing from an otherwise complete scene—and ZestUp is the missing element.

Consumer Insight

People naturally stop when something in an image feels incomplete or unusual. A visual puzzle creates curiosity and encourages people to look twice.

Campaign Headline

“Something’s Missing.”

Why It Was Shortlisted

It has the strongest visual/KV potential among the three. It can work without requiring a long explanation, making it particularly suitable for digital advertising and Gen-AI-generated visuals.

Main Creative Strength

Visual memorability.

The campaign can create unusual, surreal and scroll-stopping advertising images while keeping ZestUp central.

Main Weakness / Risk

The concept needs careful execution so that the visual puzzle remains immediately understandable. If the “missing” element is too abstract, the audience may not connect it to ZestUp.

Visual Direction

A college canteen table is set up with everything seemingly ready:

- Food
- Friends
- Phones
- Bags
- Chairs

But there is a clearly visible ZestUp-shaped empty space in the scene.

The final visual reveals the ZestUp can.

The same device could be adapted to desks, gaming setups, hangouts, cafés and other youth environments.

Social Media Extension

Create “Spot What’s Missing” posts and Reels.

Users see an unusual image and have to identify what is missing before the ZestUp reveal.

How It Could Be Developed Further

Build a complete series of visual puzzles across different youth environments. The campaign could expand into carousel posts, interactive Stories, Reels, influencer challenges and even outdoor advertising where people physically identify the missing element.

Campaign	Score /30	Main Strength	Main Weakness	Visual Potential	Overall Potential
ZestUp Status	30	Strong brand ownership and youth-language potential	Could become too social-media dependent	Excellent	Excellent
Submission Sent	29	Extremely relatable consumer insight	Can become too focused on student/work submissions	Excellent	Very High
The Missing Sip	29	Strong visual and product-led concept	Visual puzzle must remain easy to understand	Excellent	Very High

Which Appears Strongest?

Based purely on the evaluation, ZestUp Status appears strongest, primarily because it scored 30/30 and has the rare ability to make the brand name itself part of youth communication.

However, the three territories have different advantages:

- ZestUp Status → strongest brand platform
- Submission Sent → strongest consumer insight
- The Missing Sip → strongest visual/KV platform

So while ZestUp Status currently leads on the evaluation, it should not yet be treated as the final campaign winner. The next step should use human creative judgment to decide which territory has the best combination of strategic strength, originality, campaign longevity and executional appeal.

Final Campaign Selection

FINAL CAMPAIGN SELECTION

We have now shortlisted 3 ZestUp campaign territories in Step 9.

I want to select ONE final campaign that will be developed into the complete advertising campaign.

Use the 3 shortlisted campaigns and their Step 8 evaluation results as the basis for comparison.

Evaluate the three campaigns on:

1. Brand Fit
2. Originality
3. Strength of Consumer Insight
4. Audience Relevance
5. Visual Potential
6. Social Media Potential
7. Ease of Execution
8. Long-Term Campaign Potential

First, create a clear comparison table:

| Campaign | Brand Fit /5 | Originality /5 | Consumer Insight /5 | Audience Relevance /5 | Visual Potential /5 | Social Potential /5 | Ease of Execution /5 | Long-Term Potential /5 | Total /40 |

Then provide a detailed comparison of the 3 campaigns.

For each campaign explain:

- What makes the idea strong
- What makes it different
- What type of advertising executions it can support
- Its biggest weakness or risk
- How easily it can be developed using Generative AI
- Whether the idea can remain useful beyond one single advertisement

Then provide:

AI RECOMMENDATION

Recommend ONE campaign as the strongest option.

Explain clearly why you recommend it.

IMPORTANT:

The AI recommendation is NOT the final human decision.

After the recommendation, create a section called:

HUMAN CREATIVE DECISION

Provide a short framework that I can use to make my own final decision.

Consider:

- Which idea feels most distinctive?
- Which idea has the strongest visual world?
- Which idea best represents ZestUp?
- Which idea would be easiest to turn into a strong Key Visual?
- Which idea would look most impressive as a GenAI case study?
- Which idea has the strongest potential for social media?
- Which idea would I personally be most confident presenting in my college viva?

Do NOT create any new campaign ideas.

Use only the 3 shortlisted campaigns from Step 9.

Do not automatically choose the campaign with the highest numerical score. Consider the overall creative potential as well.

AI Output :- FINAL CAMPAIGN SELECTION

The three shortlisted territories bring three different strengths to the table:

- ZestUp Status → strongest brand platform and youth-culture relevance
- Submission Sent → strongest specific consumer insight
- The Missing Sip → strongest visual/product-led territory

Campaign	Brand Fit /5	Originality /5	Consumer Insight /5	Audience Relevance /5	Visual Potential /5	Social Potential /5	Ease of Execution /5	Long-Term Potential /5	Total /40
ZestUp Status	5	5	5	5	5	5	5	5	40
Submission Sent	5	4	5	5	5	5	5	4	38

The	5	5	4	4	5	5	5	5	38
Missing									
Sip									

1. ZestUp Status

What makes the idea strong

The biggest strength is that ZestUp becomes more than a product name—it becomes a way of expressing your current state.

The line:

“Current Status: ZestUp.”

is short, memorable and naturally connected to contemporary youth communication.

It also directly supports the brand’s youthful, witty and contemporary personality.

What makes it different

Unlike the other two ideas, this territory is fundamentally about brand language.

It doesn’t depend on one specific situation such as submitting an assignment or solving a visual puzzle. The word ZestUp can potentially be inserted into many different everyday situations.

Advertising executions it can support

- Social media posts
- Instagram Stories
- Reels
- Digital banners
- Meme-style advertising
- Influencer content
- Outdoor advertising
- Phone-interface-inspired KVs
- Short videos
- Potential packaging communication

Biggest weakness / risk

The biggest risk is that it could become too dependent on social-media terminology.

If executions simply keep changing the status message, the campaign could eventually feel repetitive. The visual identity and broader campaign system therefore need to be strong.

Generative AI potential

Excellent.

GenAI can easily create visually exaggerated status screens, surreal environments and highly stylised youth scenes while keeping the ZestUp can as the hero.

Beyond one advertisement?

Definitely.

This is one of the strongest aspects of the idea. "Status" can be applied to countless situations, making it capable of becoming a campaign platform rather than a single execution.

2. Submission Sent

What makes the idea strong

The strength comes from a very specific and recognizable behavior:

You work → you click Submit → it's finally done.

The headline:

"Sent. Done. ZestUp."

has a simple three-part rhythm and gives ZestUp a natural role in that moment.

What makes it different

It is the most insight-led and situation-specific of the three.

It doesn't try to describe youth culture generally. Instead, it identifies one highly relatable moment experienced by students and young professionals.

Advertising executions it can support

- Assignment submissions
- Presentation submissions
- Internship applications
- Project deliveries
- Reports

- Emails
- Digital work
- Reels showing the final “Submit” moment
- Static KVs
- Meme content

Biggest weakness / risk

Its biggest limitation is territory size.

If it remains focused only on assignments and submissions, it could eventually feel repetitive or become too heavily associated with student life.

Generative AI potential

Very good.

The concept has a simple visual structure that GenAI can execute effectively: laptop screen + submit button + dramatic product reveal.

However, it doesn’t offer quite as broad a surreal visual world as The Missing Sip.

Beyond one advertisement?

Yes, but with some limitations.

It can become a campaign series around different “finally done” moments, but its long-term territory is narrower than ZestUp Status.

3. The Missing Sip

What makes the idea strong

This is the most visually distinctive territory.

The idea creates a visual puzzle where something appears incomplete, with ZestUp eventually revealed as the missing element.

The headline:

“Something’s Missing.”

creates curiosity and encourages the viewer to examine the visual.

What makes it different

Unlike ZestUp Status, which is language-led, and Submission Sent, which is insight-led, The Missing Sip is primarily visual-led.

Its strength lies in creating unusual advertising imagery.

Advertising executions it can support

- Key Visuals
- Instagram carousels
- Reels
- Interactive Stories
- Digital banners
- Outdoor advertising
- Visual puzzles
- Product photography
- GenAI surreal imagery

Biggest weakness / risk

The biggest risk is clarity.

The audience must understand what is missing and why ZestUp is the answer. If the visual becomes too complicated or surreal, the campaign could look interesting without communicating effectively.

Generative AI potential

Excellent.

This may actually be the strongest of the three for GenAI experimentation because the concept allows surreal compositions, impossible environments and visually unusual product interactions.

Beyond one advertisement?

Yes.

The visual puzzle can be repeated across many environments—college, office, commuting, socialising, gaming, etc.—while retaining the same creative device.

Overall Creative Comparison

ZestUp Status

Best for: Building a recognizable brand platform

It has the strongest combination of brand ownership, audience relevance, social potential and longevity.

Submission Sent

Best for: A powerful consumer-insight-driven campaign

It is probably the easiest concept to explain in a viva because the insight is immediately relatable and understandable.

The Missing Sip

Best for: A visually impressive advertising/KV campaign

It gives you the greatest freedom to create striking GenAI visuals and could potentially produce the most eye-catching campaign presentation.

AI RECOMMENDATION

Recommended Campaign: ZestUp Status

Although ZestUp Status has the highest numerical score, I would not recommend it simply because it scored 40/40.

I recommend it because it has the strongest combination of strategic idea + brand ownership + social scalability + campaign longevity.

The key advantage is that the campaign doesn't merely advertise the drink—it gives the brand name a role in youth culture.

“Current Status: ZestUp.”

is also flexible enough to become a recurring communication system rather than being limited to one particular situation.

For a fictional FMCG launch campaign, that makes it particularly strong because you can demonstrate how the same central idea works across:

KV → Social → Reels → Stories → Influencers → Digital Ads → Outdoor

It also gives you a clear strategic explanation:

Consumer behavior: Young people communicate their moods and situations through statuses and short-form digital language.

Brand opportunity: Turn ZestUp into one of those expressions.

Campaign thought: Current Status: ZestUp.

Final AI Recommendation:

ZestUp Status — strongest overall campaign platform.

This is a recommendation, not the final human selection.

HUMAN CREATIVE DECISION

Use the following framework before making your final choice:

Question	ZestUp Status	Submission Sent	The Missing Sip
Which feels most distinctive?	★★★★★	★★★★☆	★★★★★
Which has the strongest visual world?	★★★★★	★★★★☆	★★★★★
Which best represents ZestUp?	★★★★★	★★★★★	★★★★★
Which is easiest to turn into a strong KV?	★★★★★	★★★★★	★★★★★
Which would look most impressive as a GenAI case study?	★★★★★	★★★★☆	★★★★★
Which has strongest social-media potential?	★★★★★	★★★★★	★★★★★
Which is easiest to explain in a college viva?	★★★★★	★★★★★	★★★★☆

Before making your final decision, ask yourself:

1. Which idea would I remember if I saw all three campaigns six months later?

2. Which one feels most uniquely “ZestUp” rather than something another beverage brand could use?
3. Which one can generate the strongest hero Key Visual?
4. Which campaign can give me the most interesting GenAI execution?
5. Which idea can produce multiple advertisements without becoming repetitive?
6. Which one can I confidently explain in my viva from insight → idea → execution → social extension?
7. Most importantly: Which campaign would I personally be excited to see as the final ZestUp advertisement?

Decision Guidance

If your priority is brand building and campaign longevity → ZestUp Status

If your priority is relatability and a sharp consumer insight → Submission Sent

If your priority is visual impact and GenAI creativity → The Missing Sip

Based on the complete evaluation, my recommendation remains: ZestUp Status. But the final campaign should be the one you believe has the strongest creative expression when you imagine the actual finished ZestUp campaign.

FINAL HUMAN CAMPAIGN SELECTION (me)

FINAL SELECTED CAMPAIGN: ZESTUP STATUS

Campaign Line:

“Current Status: ZestUp.”

Final Decision:

I have selected “ZestUp Status” as the final campaign territory for ZestUp.

I selected this campaign because it has the strongest combination of brand fit, youth-culture relevance, originality, visual potential, social-media scalability and long-term campaign potential.

The idea turns the brand name “ZestUp” into a way of expressing a young person's current mood, situation or state. This makes ZestUp more than just the name of a beverage—it becomes part of the language of its target audience.

Why I selected it:

1. Strong Brand Connection

The campaign directly uses the ZestUp brand name and gives it a memorable role in communication.

2. Strong Youth Relevance

Young audiences naturally communicate through statuses, captions, short messages, emojis and digital interfaces. The concept fits naturally into this behaviour.

3. Strong Visual Potential

The campaign can use phone-status interfaces, social-media layouts, battery indicators, notifications and other digital elements to create visually interesting advertising.

4. Strong Social-Media Potential

The concept can easily extend into Instagram posts, Stories, Reels, memes, interactive formats and user-generated content.

5. Long-Term Potential

“Current Status: ZestUp.” can be adapted to many different situations, moods and everyday moments without changing the central campaign idea.

6. Strong GenAI Potential

The concept provides opportunities to experiment with Generative AI for advertising copy, visual compositions, digital interfaces, surreal environments and campaign adaptations.

Human Creative Decision:

Although AI recommended ZestUp Status based on the evaluation, I made the final decision myself after comparing the three shortlisted campaigns.

I believe ZestUp Status gives me the strongest opportunity to develop a complete and visually engaging advertising campaign while demonstrating how Generative AI can assist a human creative process.

FINAL CAMPAIGN:

ZestUp Status

MASTER CAMPAIGN LINE:

“Current Status: ZestUp.”

Final Campaign Strategy

FINAL CAMPAIGN STRATEGY

We have selected the final ZestUp campaign:

CAMPAIGN: ZestUp Status

MASTER CAMPAIGN LINE: “Current Status: ZestUp.”

Now develop the complete strategic foundation for this campaign.

Do NOT create a different campaign idea.

Do NOT change the campaign line.

Build everything around the existing “ZestUp Status” concept.

Develop the following sections:

1. CONSUMER INSIGHT

Identify a strong and realistic insight about 18–25-year-old Indian college students and young professionals.

The insight should explain why young people naturally communicate their moods, situations and current activities through short statuses, captions, messages, emojis and digital language.

Make the insight specific and human rather than generic.

2. CONSUMER PROBLEM / TENSION

What everyday tension or behaviour does the campaign tap into?

Explain it in simple language.

3. BRAND ROLE

What role does ZestUp play in the consumer's life?

Explain how the beverage fits naturally into the “ZestUp Status” idea.

4. BIG IDEA

Clearly define the central creative idea behind “ZestUp Status.”

Explain how ZestUp transforms from simply being a beverage brand name into a way of expressing someone's current state.

5. CAMPAIGN LINE

Keep the existing campaign line:

“Current Status: ZestUp.”

Explain why this line works.

6. REASON TO BELIEVE

Explain what makes this campaign believable from a product and communication perspective.

Do NOT make unsupported health, energy or performance claims.

Focus on the product's refreshing lemon-mint personality and youthful positioning.

7. TARGET AUDIENCE

Define the primary target audience:

Age
Lifestyle
Behaviours
Digital habits
Interests
Advertising/media behaviour

Keep it relevant to India.

8. BRAND PERSONALITY

Define 4–5 personality characteristics for ZestUp.

For example:

Youthful
Witty
Energetic
Playful
Contemporary

Explain each briefly.

9. VISUAL WORLD

Develop a clear visual direction for the campaign.

Explain:

- Colour/visual mood
- Typography direction
- Digital interface elements
- Product placement
- Photography/AI visual style
- Composition
- Backgrounds
- Lemon and mint integration
- How the “status” concept should visually appear

The visual world should be suitable for Generative AI image creation.

10. COPY SYSTEM

Create examples of how “Current Status: ZestUp.” can be adapted into different situations.

Give 10 examples.

Examples can cover:

College

Work

Friends

Commuting

Gaming

Music

Weekend

After-class moments

Social situations

Everyday breaks

Keep the copy short, witty and youthful.

11. SOCIAL MEDIA EXTENSION

Explain how the campaign can extend to:

Instagram Posts

Instagram Stories

Reels

Interactive content

User-generated content

Give 2–3 concrete examples for each.

12. CAMPAIGN COMMUNICATION STRUCTURE

Show the campaign as:

Consumer Insight

Consumer Tension

Brand Role

Big Idea

Campaign Line

Visual World

Social Extensions

13. GEN AI ROLE

Explain specifically where Generative AI can assist in this campaign.

Separate the process into:

Ideation

Copywriting

Visual Concept Development

Image Generation

Creative Iteration

Campaign Adaptation

Also clearly explain where human creative judgment is still required.

14. FINAL STRATEGIC SUMMARY

End with a concise summary explaining why “ZestUp Status” is a strong campaign platform for the fictional ZestUp brand.

IMPORTANT:

Keep the strategy realistic and suitable for a college GenAI advertising case study.

Do not make the campaign sound like a complicated AI product.

The purpose is to demonstrate how Generative AI can assist an advertising creative workflow from strategy to execution while keeping human judgment involved.

AI Output :- STEP 11 — FINAL CAMPAIGN STRATEGY

ZestUp Status

Campaign: ZestUp Status

Master Campaign Line: “Current Status: ZestUp.”

1. CONSUMER INSIGHT

Young Indians aged 18–25 often communicate their current state in short, instantly understandable digital language rather than explaining how they feel in full sentences.

A WhatsApp status, Instagram Story, caption, emoji, “currently listening to...”, or even a simple “busy,” “free,” or “done” can communicate an entire situation.

For this audience, how you are right now is often something you express, not explain.

Core Insight

“I don’t always explain what I’m feeling or doing—I just give people a quick status.”

This makes “ZestUp” naturally capable of becoming one of those statuses.

2. CONSUMER PROBLEM / TENSION

Young people’s days are constantly changing.

One moment they’re in class, then commuting, working, meeting friends, gaming, listening to music or simply taking a break.

Their status keeps changing throughout the day, but most brands talk to them as if they have one fixed mood.

The Tension

“My day keeps switching statuses. I need a way to express the moment I’m in.”

ZestUp can become a simple, playful expression for those moments.

3. BRAND ROLE

ZestUp is the refreshing punctuation mark in the middle of the day.

It fits naturally into moments when someone takes a break, switches from one activity to another or simply wants a refreshing lemon-mint drink.

Rather than saying that ZestUp will make someone perform better, the brand simply becomes a recognizable way of saying:

“This is where I’m at right now.”

So:

Status → ZestUp

4. BIG IDEA

ZestUp Status

Transform ZestUp from merely a beverage brand name into a way of expressing someone’s current state.

Instead of:

“How are you?”

The communication can become:

“Current Status: ZestUp.”

The campaign can then reinterpret everyday situations through the language of statuses.

For example:

Current Status: Between Classes
Current Status: Plans Finally Happened
Current Status: Music On
Current Status: Weekend Mode
Current Status: ZestUp

The product becomes the physical representation of that status.

5. CAMPAIGN LINE

“Current Status: ZestUp.”

Why it works

1. Brand-owned

It directly uses the ZestUp name.

2. Short and memorable

The structure is easy to understand and repeat.

3. Youthful

It borrows from the familiar language of digital statuses.

4. Flexible

It can adapt across dozens of situations without changing the central campaign idea.

5. Social-native

It naturally fits Instagram Stories, captions, Reels and messaging culture.

6. REASON TO BELIEVE

The campaign is believable because it is grounded in the product’s actual personality rather than unsupported functional claims.

ZestUp has:

- **A lemon-mint flavour profile**
- **A refreshing beverage proposition**
- **A youthful and contemporary brand personality**
- **A format that naturally fits short breaks and everyday moments**

The communication therefore doesn't need to claim that ZestUp makes someone smarter, stronger, more productive or healthier.

Instead, the campaign communicates a simple experience:

A refreshing lemon-mint drink that fits naturally into the moments you want to enjoy.

The “status” is a communication device, not a product performance claim.

7. TARGET AUDIENCE

Age

18–25 years

Primary Audience

- **Indian college students**
- **University students**
- **Interns**
- **Early-career professionals**
- **Young urban consumers**

Lifestyle

Their days move between:

- **College**
- **Work**
- **Classes**
- **Commutes**
- **Friends**
- **Hobbies**
- **Gaming**
- **Music**
- **Social media**
- **Short breaks**
- **Weekend plans**

Behaviours

They:

- **Constantly switch between activities**

- Communicate through short-form digital language
- Share moments online
- Use humour and cultural references
- Discover brands through social media
- Prefer brands that feel culturally relevant rather than overly formal

Digital Habits

Heavy users of:

- Instagram
- WhatsApp
- YouTube
- Short-form video
- Memes
- Stories
- Messaging platforms
- Digital communities

Interests

- Music
- Gaming
- Food
- Fashion
- Fitness
- Entertainment
- College culture
- Technology
- Friends/socialising
- Creators and online trends

Advertising Behaviour

They are exposed to a large amount of advertising every day, so they are more likely to notice communication that is:

quick + visual + relatable + culturally familiar + entertaining.

8. BRAND PERSONALITY

Personality : What it means for ZestUp

Youthful : Speaks naturally to 18–25-year-olds without trying too hard to sound young.

Witty Uses clever observations and short, memorable copy.

Energetic : Feels lively and dynamic without making exaggerated performance claims.

Playful : Doesn't take everyday situations too seriously.

Contemporary : Uses modern digital language, visual culture and social formats.

9. VISUAL WORLD

Overall Visual Mood

Fresh + digital + vibrant + playful + slightly surreal

The campaign should feel like social media language brought into the physical world.

Colour / Visual Mood

Use a fresh palette built around:

- **Lemon yellow**
- **Mint green**
- **Cool light tones**
- **White**
- **Deep contrasting text elements**

The overall look should feel clean and refreshing rather than overly neon or aggressive.

Typography

Use:

- **Bold sans-serif typography**
- **Large, short headlines**
- **Digital-interface-inspired text**
- **Clean status labels**
- **Occasional UI-style boxes or notification elements**

Example:

CURRENT STATUS:

ZESTUP

Digital Interface Elements

Use visual cues inspired by:

- **Status bars**

- Notification cards
- Chat bubbles
- Battery indicators
- Music players
- Calendar screens
- Location tags
- Poll interfaces

These should inspire the visual language without copying any specific platform's interface exactly.

Product Placement

The ZestUp can should remain a clear visual hero.

Possible placements:

- In the foreground
- Beside a phone
- On a desk
- In a hand
- At the centre of a status card
- Integrated into the environment

Photography / GenAI Style

Use:

- Young Indian adults aged 18–25
- Natural expressions
- Realistic Indian environments
- Contemporary clothing
- Cinematic lighting
- High-detail product rendering
- Fresh condensation on the can
- Dynamic compositions

Avoid overly artificial “perfect influencer” imagery.

Composition

A useful structure:

Situation → Status → ZestUp

For example:

A young professional sitting at a café with a laptop.

Large typography:

**CURRENT STATUS:
OFFICE → OUT**

ZestUp sits prominently in the foreground.

Lemon + Mint Integration

Lemon and mint should act as visual brand assets, not random decoration.

They can:

- **Frame the product**
- **Appear around the status text**
- **Create motion**
- **Form graphic patterns**
- **Interact with the environment**
- **Add freshness to otherwise ordinary scenes**

Status Treatment

The recurring visual device should be:

**CURRENT STATUS:
[Situation / Mood]**

with ZestUp eventually becoming the hero status.

10. COPY SYSTEM

The master structure remains:

CURRENT STATUS: _____.

Examples:

Situation	Campaign Copy
College	Current Status: Between Classes.
Work	Current Status: Off the Clock.

Friends	Current Status: Plans Happened.
Commute	Current Status: Somewhere Between.
Gaming	Current Status: One More Game.
Music	Current Status: Headphones On.
Weekend	Current Status: Weekend Mode.
After Class	Current Status: Class Over.
Socialising	Current Status: Out With My People.
Everyday Break	Current Status: ZestUp.

The final brand expression consistently returns to:

“Current Status: ZestUp.”

11. SOCIAL MEDIA EXTENSION

Instagram Posts

Example 1 — Status Carousel

Slide 1:

Current Status: In Class.

Slide 2:

Current Status: Watching The Clock.

Slide 3:

Current Status: Class Over.

Slide 4:

Current Status: ZestUp.

Example 2 — Status Situations

A series of static KVs:

Current Status: 3% Battery.

Current Status: 0% Plans.
Current Status: Suddenly Free.
Current Status: ZestUp.

Example 3 — Product-Led Post

A chilled ZestUp can surrounded by lemon and mint.

Headline:

CURRENT STATUS: CHILLED.

Instagram Stories

Example 1 — Status Poll

CURRENT STATUS?

- ☐ **Locked in**
 - ☐ **Need a break**
 - ☐ **Out with friends**
 - ☐ **ZestUp**
-

Example 2 — Tap-through Status

Story 1:

Current Status: Class.

Story 2:

Current Status: Done.

Story 3:

Current Status: Canteen?

Story 4:

Current Status: ZestUp.

Example 3 — Audience Interaction

**Update your status:
What's your current vibe?**

Users select from different ZestUp-themed options.

Reels

Example 1 — Status Transition

A person is sitting in class.

Text:

Current Status: Class

They close their notebook.

Transition.

Current Status: Outside

They open ZestUp.

Current Status: ZestUp.

Example 2 — Multiple Statuses

Fast cuts between:

College → Metro → Laptop → Friends → Music → ZestUp.

Each scene gets its own status label.

Example 3 — “Day in Statuses”

A creator documents their entire day using only status cards:

9 AM — Current Status: Running Late

11 AM — Current Status: In Class

2 PM — Current Status: Lunch

5 PM — Current Status: Finally Free

7 PM — Current Status: ZestUp

Interactive Content

1. Status Generator

Users enter their current situation and receive a branded:

Current Status: _____.

template.

2. Status Polls

Followers vote on their current state:

Current Status:

Locked In / Zoned Out / Out & About / ZestUp

3. “Change Your Status”

A simple interactive Story sequence where users tap through different situations until they reach:

Current Status: ZestUp.

User-Generated Content

1. #CurrentStatusZestUp

Users post their current situation using the campaign format.

2. Creator Status Diaries

Creators show different moments of their day through ZestUp status cards.

3. Status Templates

ZestUp provides editable Story templates where users fill in:

Current Status: _____.

This allows the audience to participate without needing to create complicated content.

12. CAMPAIGN COMMUNICATION STRUCTURE

Consumer Insight

↓

Young people naturally express their current mood and situation through short digital statuses.

↓

Consumer Tension

Their day constantly changes, so their “status” keeps changing too.

↓

Brand Role

ZestUp becomes a refreshing way to express and punctuate those everyday moments.

↓

Big Idea

Turn ZestUp from a beverage name into a youthful status expression.

↓

Campaign Line

“Current Status: ZestUp.”

Visual World

Digital-status interfaces + realistic youth environments + lemon-mint freshness + hero product.

Social Extensions

Stories + Reels + status templates + polls + UGC + creator content.

13. GENAI ROLE

The campaign should demonstrate AI-assisted creative development, not an “AI-powered beverage.”

A. Ideation

GenAI can assist with:

- **Exploring campaign executions**
- **Generating situation lists**
- **Developing alternative visual directions**
- **Finding different ways to express the status concept**
- **Exploring social-media formats**

Human role

The creative team decides:

- **Which ideas are strategically relevant**
- **Which insights are authentic**
- **What fits the brand**
- **What should be rejected**

B. Copywriting

GenAI can generate:

- **Status variations**
- **Headlines**
- **Social captions**
- **Story copy**

- **Reel scripts**
- **Different tone variations**

Human role

Humans select and refine the copy to ensure it feels:

natural + witty + youthful + brand-specific.

C. Visual Concept Development

GenAI can help explore:

- **KV compositions**
- **Product placement**
- **Status-interface layouts**
- **Lemon/mint integration**
- **Background environments**
- **Lighting directions**
- **Surreal visual possibilities**

Human role

The creative team establishes the final:

art direction + composition + visual hierarchy + brand consistency.

D. Image Generation

GenAI can generate:

- **Indian college environments**
- **Young professionals**
- **Contemporary lifestyle scenes**
- **Surreal lemon/mint environments**
- **Product-centric KVs**
- **Social-media visual concepts**

The product should then be carefully checked for accurate branding, packaging and visual consistency.

E. Creative Iteration

GenAI allows rapid testing of:

- **Different backgrounds**
- **Different compositions**
- **Different poses**
- **Different status treatments**
- **Different lemon/mint arrangements**
- **Different visual styles**

Instead of producing one concept, the team can quickly explore multiple routes before selecting the strongest execution.

F. Campaign Adaptation

Once the master KV is established, GenAI can assist in adapting the visual system for:

- **Instagram posts**
- **Stories**
- **Reels**
- **Digital banners**
- **Different situations**
- **Different audience contexts**
- **Different aspect ratios**

Human role

Humans remain responsible for deciding:

- **Which adaptations are worth producing**
 - **Whether the campaign remains coherent**
 - **Whether the product remains prominent**
 - **Whether the visual communicates clearly**
 - **Whether the work actually feels like ZestUp**
-

14. FINAL STRATEGIC SUMMARY

ZestUp Status gives the fictional brand a simple but expandable creative platform:

“Current Status: ZestUp.”

The strategy begins with a real behavior among young Indians: expressing their current state through short digital language.

ZestUp takes that familiar behavior and turns its own name into a status.

The campaign therefore connects:

Youth culture + digital language + everyday moments + refreshing lemon-mint personality.

Its biggest strategic advantage is that it isn't restricted to one situation. The same platform can move from college to work, commuting to socialising, weekdays to weekends, while maintaining one recognizable campaign structure.

Generative AI can support the process by helping the creative team explore, visualize, iterate and adapt the campaign quickly. However, the strategic insight, final creative direction, brand judgment and selection of the strongest work remain human decisions.

That makes "ZestUp Status" a practical, contemporary and scalable platform for a GenAI-assisted FMCG advertising case study.

Copywriting Exploration

COPYWRITING EXPLORATION

We have finalized the ZestUp campaign:

CAMPAIGN: ZestUp Status

MASTER CAMPAIGN LINE:

“Current Status: ZestUp.”

Using the campaign strategy developed in Step 11, explore and develop the advertising copy for the campaign.

IMPORTANT:

Do NOT create a different campaign idea.

Do NOT change the master campaign line.

All copy must belong to the existing “ZestUp Status” campaign.

The target audience is Indian college students and young professionals aged 18–25.

The brand personality is:

- Youthful
- Witty
- Energetic
- Playful
- Contemporary

The copy should feel:

- Short
- Memorable
- Natural
- Social-media friendly
- Youthful without trying too hard
- Clever rather than overly promotional

Avoid:

- Generic motivational quotes
- Clichés such as “refresh your life”
- Overused energy-drink language
- Exaggerated health or performance claims
- Corporate language
- Copy that sounds childish or forced
- Unnecessary slang

PART 1 — MASTER HEADLINE EXPLORATION

Generate 20 alternative headline options that could work with the ZestUp Status campaign.

Keep each headline short, ideally 2–7 words.

Organize them into:

- A. Punchy
- B. Witty
- C. Youth/Digital Culture
- D. Product-Focused
- E. Situation-Based

The existing master campaign line “Current Status: ZestUp.” must remain the final campaign line, but use the alternatives only as supporting headline exploration.

PART 2 — STATUS COPY SYSTEM

Generate 20 different “Current Status:” executions based on realistic situations experienced by the target audience.

Cover situations such as:

- College
- Work
- Commuting
- Friends
- Gaming
- Music
- Weekend
- After class
- Socialising
- Studying
- Finishing work
- Taking a break

Keep each execution short and natural.

PART 3 — HERO KEY VISUAL COPY

Develop 5 possible copy combinations for the main advertising Key Visual.

For each provide:

Headline

Supporting copy
Product/brand sign-off

The master campaign line must remain:
“Current Status: ZestUp.”

The copy should work visually on a campaign poster/KV.

PART 4 — SOCIAL MEDIA COPY

Create:

5 Instagram post captions
5 Instagram Story lines
5 short Reel opening lines
5 short CTA options

Keep the language consistent with the campaign.

PART 5 — COPY EVALUATION

Evaluate the strongest copy options using:

- Brand Fit /5
- Originality /5
- Memorability /5
- Audience Relevance /5
- Visual Potential /5
- Social Media Potential /5

Create a clear table.

PART 6 — FINAL COPY SHORTLIST

Based on the evaluation, shortlist:

- 5 strongest supporting headlines
- 5 strongest “Current Status” executions
- 1 strongest Hero KV copy combination
- 3 strongest social-media copy options

Do NOT replace or change the master campaign line.

The final campaign line remains:

“Current Status: ZestUp.”

PART 7 — HUMAN CREATIVE CHECK

After giving the AI shortlist, explain what I should personally check before selecting the final copy.

Consider:

- Does it sound natural when spoken?
- Does it feel like something the target audience would actually say?
- Is it clearly connected to ZestUp?
- Is it memorable after one viewing?
- Does it work visually?
- Does it avoid generic advertising language?
- Does it strengthen the “Status” idea?

Make it clear that the final copy selection will be a human creative decision.

AI Output :-STEP 12 — COPYWRITING EXPLORATION

ZestUp Status

Master Campaign Line:

“Current Status: ZestUp.”

All copy below stays within the existing ZestUp Status campaign territory.

PART 1 — MASTER HEADLINE EXPLORATION

A. Punchy

1. **Status: ZestUp.**
2. **ZestUp. That’s the Status.**
3. **Make It ZestUp.**
4. **Status Changed.**
5. **Now, That’s ZestUp.**

B. Witty

6. Currently Doing Better.
7. Status: Looking Up.
8. Consider This an Update.
9. Update: Much Better.
10. Status Report: Sorted.

C. Youth / Digital Culture

11. Status Update: ZestUp.
12. Currently: ZestUp.
13. Mood: ZestUp.
14. BRB, ZestUp.
15. Pinned: ZestUp.

D. Product-Focused

16. Lemon. Mint. Status: ZestUp.
17. Crack Open the Status.
18. A Better Status Update.
19. Your Status, Served Cold.
20. Status, With Lemon & Mint.

E. Situation-Based

21. Class Done. Status ZestUp.
22. Break Time. Status ZestUp.
23. Plans On. Status ZestUp.
24. Work Done. Status ZestUp.
25. Out Now. Status ZestUp.

Note: The campaign's official line remains "Current Status: ZestUp." These are supporting headline explorations, not replacements.

PART 2 — STATUS COPY SYSTEM

1. Current Status: Between Classes.
2. Current Status: Class Finally Done.
3. Current Status: Assignment Sent.

4. **Current Status: Work Off.**
5. **Current Status: Commute Mode.**
6. **Current Status: With My People.**
7. **Current Status: One More Game.**
8. **Current Status: Headphones On.**
9. **Current Status: Weekend Loading.**
10. **Current Status: Out With Friends.**
11. **Current Status: Study Break.**
12. **Current Status: Deadline Met.**
13. **Current Status: Meeting Over.**
14. **Current Status: Finally Free.**
15. **Current Status: Plans Happened.**
16. **Current Status: Just Chilling.**
17. **Current Status: Break Taken.**
18. **Current Status: Playlist On.**
19. **Current Status: Done For Today.**
20. **Current Status: ZestUp.**

PART 3 — HERO KEY VISUAL COPY

KV 1 — Core Brand Expression

Headline:

Current Status: ZestUp.

Supporting Copy:

A refreshing lemon-mint break for wherever the day takes you.

Product/Brand Sign-off:

ZestUp — Lemon Mint Energy Drink

KV 2 — College

Headline:

Current Status: Class Done.

Supporting Copy:

The next thing on the schedule? ZestUp.

Product/Brand Sign-off:

Current Status: ZestUp.

KV 3 — Work

Headline:

Current Status: Work Off.

Supporting Copy:

Close the laptop. Open a ZestUp.

Product/Brand Sign-off:

Current Status: ZestUp.

KV 4 — Social

Headline:

Current Status: Plans Happened.

Supporting Copy:

Some statuses are better shared.

Product/Brand Sign-off:

Current Status: ZestUp.

KV 5 — Product-Led

Headline:

Current Status: Chilled.

Supporting Copy:

Lemon meets mint. The moment gets its update.

Product/Brand Sign-off:

Current Status: ZestUp.

PART 4 — SOCIAL MEDIA COPY

Instagram Post Captions

1.

Your day has many updates. This one's ZestUp. 🍊🌿

2.

No long explanation needed. Current Status: ZestUp.

3.

Class done. Plans on. Can cold. Status updated.

4.

Somewhere between “I need a break” and “let’s go.”

5.

Your current status called. It wants a ZestUp.

Instagram Story Lines

- 1. Current Status? 🙄**
- 2. Class done. What now?**
- 3. Update your status: ZestUp.**
- 4. Currently: somewhere between busy & free.**
- 5. Tap if your status just changed.**

Short Reel Opening Lines

- 1. POV: Your status just changed.**
- 2. Your day in five status updates.**
- 3. What’s your current status?**
- 4. One day. Too many statuses.**
- 5. And just like that... status updated.**

CTA Options

- 1. Update Your Status.**
- 2. Make It ZestUp.**
- 3. What’s Your Status?**
- 4. Switch Your Status.**
- 5. Stay ZestUp.**

PART 5 — COPY EVALUATION

The strongest options from the exploration are evaluated below.

Copy Option	Brand Fit /5	Originality /5	Memorability /5	Audience Relevance /5	Visual Potential /5	Social Media Potential /5	Total /30
ZestUp. That's the Status.	5	5	5	5	5	5	30
Current Status: ZestUp.	5	5	5	5	5	5	30
Status: Looking Up.	5	5	5	5	5	5	30
Status Update: ZestUp.	5	4	5	5	5	5	29
Currently : ZestUp.	5	4	5	5	5	5	29
Update: Much Better.	4	5	5	5	5	5	29
Mood: ZestUp.	5	4	5	5	5	5	29
Current Status: Plans Happened.	5	4	5	5	5	5	29

Current Status: Class Finally Done.	5	4	5	5	5	5	29
--	----------	----------	----------	----------	----------	----------	-----------

Current Status: Deadline Met.	5	4	5	5	5	5	29
--	----------	----------	----------	----------	----------	----------	-----------

Important creative distinction

Even though some supporting lines score similarly, “Current Status: ZestUp.” remains strategically stronger because it is the campaign’s own brand property. The supporting copy should reinforce it rather than compete with it.

PART 6 — FINAL COPY SHORTLIST

A. 5 Strongest Supporting Headlines

1. ZestUp. That’s the Status.

Strongest alternative because it directly connects the brand with the campaign idea.

2. Status: Looking Up.

Short, playful and gives the brand name an additional positive association without making a performance claim.

3. Status Update: ZestUp.

Very naturally connected to the digital-status territory.

4. Currently: ZestUp.

Extremely simple and flexible across social content.

5. Update: Much Better.

More indirect and witty, useful for supporting social executions.

B. 5 Strongest “Current Status” Executions

- 1. Current Status: Between Classes.**
- 2. Current Status: Plans Happened.**
- 3. Current Status: Headphones On.**
- 4. Current Status: Deadline Met.**
- 5. Current Status: Finally Free.**

These give the campaign a good mixture of college, social, music, work and everyday moments.

C. Strongest Hero KV Copy

HEADLINE

Current Status: ZestUp.

SUPPORTING COPY

A refreshing lemon-mint break for wherever the day takes you.

PRODUCT SIGN-OFF

ZestUp — Lemon Mint Energy Drink

Why this is the strongest KV combination

It keeps the campaign line as the unquestionable hero, communicates the product's actual lemon-mint proposition, and avoids making unsupported claims about performance or health.

D. 3 Strongest Social-Media Copy Options

1.

“No long explanation needed. Current Status: ZestUp.”

Best for static posts and Stories.

2.

“One day. Too many statuses.”

Best for a Reel or carousel showing multiple everyday moments.

3.

“What’s your current status?”

Best for interactive Stories, polls and UGC.

PART 7 — HUMAN CREATIVE CHECK

Before locking the final copy, human creative judgment should make the final call.

1. Does it sound natural when spoken?

Read the line aloud.

If it sounds like something a copywriter wrote rather than something a young person could naturally say, reconsider it.

2. Would the audience actually say it?

The campaign should borrow from youth communication without becoming an imitation of Gen-Z slang.

3. Is it clearly connected to ZestUp?

The audience should be able to understand why ZestUp is being used as a status.

4. Is it memorable after one viewing?

A strong campaign line should survive after the viewer scrolls away.

5. Does it work visually?

The copy needs to work with a phone/status interface, product shot and visual environment, not just sound good as text.

6. Does it avoid generic advertising language?

Avoid lines that could belong to any beverage brand.

The strongest copy should feel specifically connected to ZestUp Status.

7. Does it strengthen the “Status” idea?

Every major execution should make the central thought clearer:

ZestUp isn’t just what you’re drinking. It’s your current status.

Final Creative Principle

The campaign should always return to one recognizable idea:

Current Status: ZestUp.

The supporting copy can change according to the situation, but the campaign line, status structure and brand meaning should remain consistent.

The AI shortlist is therefore a creative recommendation, not the final answer. The final copy should be selected through human judgment based on naturalness, distinctiveness, visual impact and how convincingly it makes ZestUp feel like a real part of youth culture.

Visual Concept Development

VISUAL CONCEPT DEVELOPMENT

We have finalized the advertising campaign:

CAMPAIGN: ZestUp Status

MASTER CAMPAIGN LINE:

“Current Status: ZestUp.”

The campaign strategy and copywriting exploration have already been completed.

Now develop the visual concept for the campaign's HERO KEY VISUAL (KV).

IMPORTANT:

Do NOT create a new campaign idea.

Do NOT change the campaign line.

Do NOT change the brand name.

The visual must clearly belong to the existing ZestUp Status campaign.

The Hero KV should demonstrate how Generative AI can be used in advertising to transform a strategic idea into a visual concept.

PROJECT CONTEXT

Brand: ZestUp

Product: Lemon Mint Energy Drink

Target Audience: Indian college students and young professionals aged 18–25

Brand Personality:

- Youthful
- Witty
- Energetic
- Playful
- Contemporary

Campaign Idea:

ZestUp becomes a “status” that represents someone's current situation or moment.

Master Campaign Line:

“Current Status: ZestUp.”

VISUAL TERRITORY

The visual world should combine:

Digital status/interface language

+

A realistic youth environment

+

A chilled ZestUp product

+

Lemon and mint freshness

+

A clean, modern advertising aesthetic

The visual should feel like a social-media status has come to life in the physical world.

DEVELOP 5 DIFFERENT HERO KV VISUAL CONCEPTS.

For each concept, provide:

1. Concept Name
2. Situation/Setting
3. Main Visual Idea
4. Product Placement
5. Status/Interface Treatment
6. Lemon & Mint Integration
7. Camera Angle
8. Lighting
9. Colour/Visual Mood
10. Composition
11. Headline Placement
12. Why the visual communicates the campaign idea

Explore different settings such as:

- College
- Café
- Young professional workspace
- Commute
- Social/friends environment

At least one concept should be strongly product-led and at least one should be slightly surreal/GenAI-driven.

HERO COPY

Use the strongest copy from Step 12:

Headline:

“Current Status: ZestUp.”

Supporting Copy:

“A refreshing lemon-mint break for wherever the day takes you.”

Product Sign-off:

“ZestUp — Lemon Mint Energy Drink”

Explain where each piece of copy should appear in the visual.

VISUAL REQUIREMENTS

The final KV should:

- Make the ZestUp can the clear hero
- Make the campaign line immediately readable
- Have a strong visual hierarchy
- Look like professional FMCG advertising
- Feel youthful but not childish
- Feel contemporary rather than overly futuristic
- Use realistic Indian environments where appropriate
- Include condensation on the chilled can
- Use lemon and mint as recognizable visual brand assets
- Have enough negative space for typography
- Be suitable for Instagram/social advertising
- Be visually interesting enough to demonstrate GenAI experimentation

Avoid:

- Generic stock-photo aesthetics
- Excessive neon
- Overcrowded compositions
- Too many people
- Unrealistic product proportions
- Random decorative elements
- Excessive slang
- Fake UI designs that copy a specific social-media platform
- Making unsupported health or performance claims

GENAI EXPERIMENTATION

For each of the 5 concepts, identify:

- What part of the visual would be difficult to create traditionally
- What GenAI could help generate
- What problems GenAI might create
- What would still require human editing/design judgment

Finally, compare the 5 concepts using this table:

Concept | Brand Fit /5 | Originality /5 | Visual Impact /5 | Product Visibility /5 | Campaign Relevance /5 | GenAI Potential /5 | Ease of Execution /5 | Total /35

Then recommend the strongest concept for the final Hero KV.

IMPORTANT:

The recommendation is only an AI recommendation.

Explain why a human creative decision should still be made before selecting the final visual.

Do NOT generate the actual image yet.

This step is only for developing and evaluating the visual concept.

AI OUTPUT :-STEP 13 — VISUAL CONCEPT DEVELOPMENT

ZestUp Status — Hero Key Visual

Master Campaign Line:

“Current Status: ZestUp.”

Supporting Copy:

A refreshing lemon-mint break for wherever the day takes you.

Product Sign-off:

ZestUp — Lemon Mint Energy Drink

CONCEPT 1 — THE CAMPUS STATUS

1. Situation / Setting

A contemporary Indian college campus during a short break between classes.

2. Main Visual Idea

A student sits casually at an outdoor campus table with notebooks and a phone nearby. The environment is slightly blurred while the chilled ZestUp can in the foreground is extremely sharp.

A large digital-style status appears naturally within the scene:

CURRENT STATUS: ZESTUP.

The everyday college break becomes the physical manifestation of the status.

3. Product Placement

The ZestUp can occupies the foreground, positioned slightly off-centre and clearly larger/sharper than the background.

Visible condensation makes the drink feel chilled.

4. Status / Interface Treatment

A clean floating status card inspired by modern digital UI, but not resembling any specific social platform.

Example:

**CURRENT STATUS:
ZESTUP.**

5. Lemon & Mint Integration

Fresh lemon slices and mint leaves sit naturally beside the can on the table. A few subtle lemon/mint elements can visually lead the eye toward the product.

6. Camera Angle

Low, slightly elevated tabletop angle, approximately at product level.

7. Lighting

Bright natural afternoon light with soft shadows.

8. Colour / Visual Mood

Fresh, clean and youthful. Lemon and mint provide the primary visual freshness against a neutral contemporary campus environment.

9. Composition

Foreground: ZestUp can

Middle: lemon + mint

Background: softly blurred Indian campus

Upper/side negative space: headline and supporting copy

10. Headline Placement

Large headline in the upper-left:

Current Status: ZestUp.

Supporting copy directly underneath in smaller type.

11. Why It Communicates the Campaign

The visual takes an ordinary student moment and literally turns it into a status update, establishing the central campaign device immediately.

GenAI Experimentation

Difficult traditionally: Creating a realistic campus scene while maintaining a perfectly controlled product hero and subtle floating UI.

GenAI can help: Generate the Indian campus environment, lifestyle composition, lighting and initial product-world concept.

Potential GenAI problems: Incorrect can proportions, distorted branding, strange hands or unrealistic background students.

Human editing required: Final product replacement/retouching, typography, UI placement, brand consistency and composition refinement.

CONCEPT 2 — THE CAFÉ STATUS

1. Situation / Setting

A stylish Indian café where a young professional is taking a short break between work tasks.

2. Main Visual Idea

The scene is split visually between work mode and break mode.

A laptop is open in the background, but the chilled ZestUp can dominates the foreground.

The screen contains a subtle status-like visual:

WORK STATUS: PAUSED

while the main campaign message appears beside the product:

CURRENT STATUS: ZESTUP.

3. Product Placement

Large chilled can on the café table, positioned closest to camera.

4. Status / Interface Treatment

Minimal floating digital status indicators around the laptop and product.

No recognizable social-media interface.

5. Lemon & Mint Integration

Lemon peel curls and fresh mint leaves subtly frame the can, with condensation catching the light.

6. Camera Angle

Three-quarter tabletop shot, slightly above product level.

7. Lighting

Warm café ambient lighting combined with cool natural daylight from a window.

8. Colour / Visual Mood

Modern café aesthetic with fresh lemon/mint accents.

9. Composition

Laptop and workspace create the background context, while the ZestUp can occupies approximately the visual centre.

Plenty of clean negative space remains on one side for typography.

10. Headline Placement

Headline in the negative space beside the can.

Supporting copy underneath.

11. Why It Communicates the Campaign

It shows that ZestUp represents the transition into a refreshing break, while still maintaining the larger status-language idea.

GenAI Experimentation

Difficult traditionally: Achieving realistic depth, reflections, condensation and a convincing product-in-environment composition.

GenAI can help: Generate the café environment, lighting variations and multiple compositions quickly.

Potential problems: Laptop screens may contain distorted text and product branding may become inconsistent.

Human editing required: Replace the product and screen graphics, correct typography and ensure the can remains the visual hero.

CONCEPT 3 — THE COMMUTE STATUS

1. Situation / Setting

An urban Indian commute—such as a metro station or contemporary city transit environment.

2. Main Visual Idea

The world around the product is in motion while the ZestUp can is perfectly still.

People and city lights become subtle motion blur in the background.

A status card appears:

CURRENT STATUS: ZESTUP.

The concept captures the feeling of finding a small refreshing pause during a moving day.

3. Product Placement

ZestUp can positioned prominently on a station bench or held in the foreground.

4. Status / Interface Treatment

A clean location/status indicator appears visually near the can:

STATUS UPDATED

followed by:

ZESTUP.

5. Lemon & Mint Integration

Lemon slices and mint leaves can subtly interact with the movement of the scene, almost like graphic trails.

6. Camera Angle

Low-angle product shot with the city environment extending into the background.

7. Lighting

Late-afternoon or early-evening natural light with realistic urban highlights.

8. Colour / Visual Mood

Contemporary urban, fresh and cinematic.

9. Composition

Strong central product foreground + moving environment behind it.

Large negative space in the upper portion for copy.

10. Headline Placement

Upper section:

Current Status: ZestUp.

Supporting copy underneath.

11. Why It Communicates the Campaign

The constantly moving commute contrasts with the simple status update, showing ZestUp as a small refreshing moment within a busy day.

GenAI Experimentation

Difficult traditionally: Creating convincing motion blur while keeping one product perfectly sharp.

GenAI can help: Generate the moving urban environment and cinematic perspective.

Potential problems: AI may produce unrealistic crowds, vehicles, hands or signage.

Human editing required: Product compositing, environmental cleanup, typography and ensuring the visual remains believable.

CONCEPT 4 — THE FRIENDS STATUS

1. Situation / Setting

A relaxed evening hangout with three young Indian friends at an outdoor café or casual social space.

2. Main Visual Idea

Instead of focusing on the people, the camera focuses on the table.

Phones, snacks and everyday objects surround a central chilled ZestUp can.

Above the table is a clean digital-style status:

CURRENT STATUS: ZESTUP.

The friends are visible naturally in the background.

3. Product Placement

The ZestUp can sits directly in the centre of the table and becomes the visual anchor.

4. Status / Interface Treatment

A subtle status bubble is positioned above the product, almost as though the physical scene itself has generated a status update.

5. Lemon & Mint Integration

Fresh lemon wedges and mint leaves are arranged naturally around the can, creating a visual frame.

6. Camera Angle

Top-down or slightly elevated table shot.

7. Lighting

Soft golden-hour/evening lighting.

8. Colour / Visual Mood

Warm, social and youthful, balanced with the cool freshness of the chilled product.

9. Composition

Circular tabletop composition:

Friends → objects → lemon/mint → ZestUp at centre

Large clean area around the central composition for typography.

10. Headline Placement

Headline positioned at the top:

Current Status: ZestUp.

Supporting copy below or beside the product.

11. Why It Communicates the Campaign

It makes the social moment itself become a status, reinforcing that ZestUp can represent different moments rather than simply being shown as a beverage.

GenAI Experimentation

Difficult traditionally: Coordinating multiple realistic people, objects, hands, phones and product details in one composition.

GenAI can help: Generate the complete social scene and explore multiple arrangements.

Potential problems: Extra fingers, strange hands, inconsistent faces and incorrect objects.

Human editing required: Clean-up, product retouching, typography and final compositing.

CONCEPT 5 — THE STATUS COMES TO LIFE

Slightly Surreal / GenAI-Driven

1. Situation / Setting

A minimal contemporary room resembling a young person's workspace.

2. Main Visual Idea

The status literally becomes physical.

A giant translucent digital status window appears behind the ZestUp can:

CURRENT STATUS: ZESTUP.

Inside and around the status window, lemon slices and mint leaves appear to be floating in a refreshing, almost impossible environment.

The ZestUp can remains completely realistic.

3. Product Placement

The can is the undisputed hero in the centre foreground.

It is the only completely grounded physical object.

4. Status / Interface Treatment

A large three-dimensional status panel appears behind the product.

It feels like digital language has physically entered the real world.

5. Lemon & Mint Integration

Lemon slices and mint leaves float through the status panel as if the refreshing product world is breaking through the interface.

Condensation droplets can appear around the can.

6. Camera Angle

Low-angle hero product shot.

7. Lighting

Crisp studio-style lighting on the product with softer ambient lighting in the environment.

8. Colour / Visual Mood

Clean, fresh, premium and playful.

Not excessively futuristic or neon.

9. Composition

Large central product.

Behind it:

Status panel → lemon/mint → subtle depth → negative space

10. Headline Placement

The headline can be integrated directly into the status panel:

Current Status: ZestUp.

Supporting copy sits beneath it in clean typography.

11. Why It Communicates the Campaign

This is the most literal visual expression of the campaign strategy:

A digital status has come to life—and the status is ZestUp.

GenAI Experimentation

Difficult traditionally: Creating a convincing physical/digital hybrid world with floating ingredients and realistic product photography.

GenAI can help: Rapidly explore surreal compositions, floating lemon/mint elements, atmospheric effects and impossible spatial arrangements.

Potential problems: AI-generated product logos, text and can geometry may be inaccurate.

Human editing required: Product replacement, logo accuracy, typography, hierarchy, retouching and final art direction.

HERO COPY SYSTEM

The same copy should remain consistent across all five concepts.

Headline

Current Status: ZestUp.

This is the dominant visual element.

Supporting Copy

A refreshing lemon-mint break for wherever the day takes you.

This should sit directly beneath the headline in a smaller, cleaner typeface.

Product Sign-off

ZestUp — Lemon Mint Energy Drink

This should appear near the bottom of the layout, close to the product but visually subordinate to the campaign line.

VISUAL HIERARCHY

The recommended hierarchy for the Hero KV is:

1. PRODUCT

ZestUp can

↓

2. CAMPAIGN LINE

Current Status: ZestUp.

↓

3. SUPPORTING COPY

A refreshing lemon-mint break for wherever the day takes you.

↓

4. PRODUCT SIGN-OFF

ZestUp — Lemon Mint Energy Drink

The viewer should understand ZestUp + Status even if they only look at the KV for two seconds.

CONCEPT EVALUATION

Concept	Brand Fit /5	Originality /5	Visual Impact /5	Product Visibility /5	Campaign Relevance /5	GenAI Potential /5	Ease of Execution /5	Total /35
The Campus Status	5	4	4	5	5	5	5	33
The Café Status	5	4	4	5	5	5	5	33
The Commute Status	5	5	5	5	5	5	4	34
The Friends Status	5	4	5	5	5	5	4	33
The Status Comes to Life	5	5	5	5	5	5	4	34

AI RECOMMENDATION

Recommended Hero KV: The Status Comes to Life

This is the strongest option for the Hero KV specifically.

The reason is not simply its score. It has the clearest connection between the strategic idea and the visual execution.

The campaign says:

ZestUp becomes a status.

The visual literally shows:

A status becoming a physical world around the ZestUp product.

That makes the strategy immediately visible rather than requiring the viewer to understand it through copy alone.

It also offers the strongest opportunity to demonstrate Generative AI as a creative visualization tool because the digital interface, lemon, mint and physical environment can interact in ways that would be expensive or complicated to photograph traditionally.

Why it stands out

Strategic clarity: ★★★★★

Visual distinctiveness: ★★★★★

Product visibility: ★★★★★

GenAI showcase: ★★★★★

Campaign scalability: ★★★★★

However, The Commute Status is a very strong alternative if the goal is a more realistic, relatable FMCG advertisement.

HUMAN CREATIVE DECISION

The AI recommendation should not automatically become the final visual.

Before selecting the Hero KV, a human creative team should ask:

- 1. Does the visual communicate “ZestUp Status” without needing an explanation?**
- 2. Is the ZestUp can the first thing people notice?**
- 3. Does the visual feel like a real FMCG advertisement rather than an AI experiment?**
- 4. Is the surreal element helping the idea or distracting from it?**
- 5. Does the lemon-mint product identity remain clear?**
- 6. Would this image stop someone while scrolling Instagram?**
- 7. Can the same visual system be adapted into other campaign executions?**
- 8. Would I be confident presenting this KV as the centrepiece of my advertising case study?**

The final decision should balance creative distinctiveness with communication clarity.

The strongest Hero KV is not necessarily the most complicated one. It is the one where the audience immediately sees:

ZestUp + Status + Refreshing Moment

and remembers:

“Current Status: ZestUp.”

Visual Generation & Iterations

HERO KEY VISUAL GENERATION

We have finalized the advertising campaign:

CAMPAIGN: ZestUp Status

MASTER CAMPAIGN LINE:

“Current Status: ZestUp.”

SELECTED HERO KV CONCEPT:

“The Status Comes to Life”

The strategic idea is that ZestUp becomes a status representing someone's current state.

The Hero KV should visually communicate this idea immediately.

IMPORTANT:

Do NOT create a new campaign.

Do NOT change the campaign line.

Do NOT change the selected concept.

Do NOT create a completely different visual direction.

Your task is to develop a professional AI-image-generation prompt for the Hero Key Visual.

PRODUCT

Fictional brand: ZestUp

Product: Lemon Mint Energy Drink

The ZestUp can should be the clear visual hero.

VISUAL CONCEPT

Create a premium FMCG advertising scene in which a realistic chilled ZestUp can exists in the foreground of a clean contemporary environment.

Behind the can, a large three-dimensional digital status panel appears to have physically come to life.

The visual concept should communicate:

DIGITAL STATUS → PHYSICAL WORLD → ZESTUP

The status panel represents the campaign idea:

“Current Status: ZestUp.”

The status/interface should feel inspired by modern digital communication but must NOT copy Instagram, WhatsApp, iOS, Android or any specific platform.

VISUAL DETAILS

Product:

- One realistic ZestUp can
- Central hero position
- Premium product photography
- Sharp focus
- Visible condensation
- Cold droplets on the surface
- Realistic metallic reflections
- Accurate cylindrical can proportions
- Clean, believable packaging
- No additional cans

Lemon and mint:

- Fresh lemon slices
- Fresh mint leaves
- Natural water droplets
- Some lemon and mint elements floating around the status panel
- They should feel integrated into the visual concept rather than randomly scattered
- The ingredients should reinforce the lemon-mint identity

Status panel:

- Large translucent three-dimensional digital panel
- Positioned behind the product
- Clean modern interface aesthetic
- Subtle depth and glow
- Minimal, premium design
- Clearly separated from the product
- Not excessively futuristic
- Not neon-heavy
- No recognizable social-media branding

Environment:

- Minimal contemporary setting
- Premium advertising environment
- Slightly surreal but believable
- Clean background

- Subtle depth
- Enough negative space for typography

Lighting:

- Crisp studio-quality lighting
- Soft ambient environment lighting
- Product highlights and realistic reflections
- Fresh, cool visual feeling
- Cinematic but commercially believable

Composition:

- Vertical advertising composition
- ZestUp can in the centre foreground
- Status panel behind the product
- Lemon and mint creating controlled visual movement
- Strong visual hierarchy
- Clean negative space for headline and supporting copy

CAMPAIGN COPY

The exact campaign typography should preferably be added later in Canva/Photoshop rather than relying on AI-generated text.

Reserve clear negative space for:

“Current Status: ZestUp.”

Supporting copy:

“A refreshing lemon-mint break for wherever the day takes you.”

Product sign-off:

“ZestUp — Lemon Mint Energy Drink”

The generated image should therefore have clear areas where these texts can be placed cleanly.

STYLE

Premium FMCG advertising
Contemporary
Youthful
Fresh

Playful
Slightly surreal
Photorealistic
High detail
Commercial product photography
Social-media-ready
Indian youth-market relevance

AVOID

- Distorted can
- Incorrect product proportions
- Multiple cans
- Fake or unreadable branding
- Garbled typography
- Excessive neon
- Overly futuristic sci-fi aesthetics
- Overcrowding
- Random ingredients
- Excessive people
- Stock-photo appearance
- Specific social-media logos
- Watermarks
- Unnecessary text inside the generated image

OUTPUT

First provide:

1. FINAL IMAGE-GENERATION PROMPT
2. NEGATIVE PROMPT / THINGS TO AVOID
3. RECOMMENDED IMAGE FORMAT AND COMPOSITION
4. EXPLANATION OF WHY THE PROMPT COMMUNICATES “ZESTUP STATUS”

Then generate the Hero Key Visual.

After generating it, identify 3–5 things that should be checked before accepting the visual as the final campaign KV, including:

- Product accuracy
- Visual hierarchy
- Campaign clarity
- Text/typography space
- Lemon-mint integration

- Overall advertising quality

Remember: the first generated visual is VERSION 1, not automatically the final visual.

AI OUTPUT :-

ITERATION 1 - V1 EVALUATION

VERSION 1 HERO KV EVALUATION

We have generated Version 1 of the ZestUp Status Hero Key Visual.

Campaign:
ZestUp Status

Master Campaign Line:
“Current Status: ZestUp.”

Selected Concept:
“The Status Comes to Life”

Analyze the generated Version 1 visual critically as an advertising creative director.

Do NOT create a new campaign or change the campaign idea.

Evaluate the visual on:

1. Product Visibility

Is the ZestUp can clearly the hero?

2. Campaign Communication

Does the visual immediately communicate the idea that a “status” has come to life?

3. Visual Hierarchy

What does the viewer notice first, second and third?

4. Composition

Is the placement of the product, status panel, lemon and mint elements balanced?

5. Brand Fit

Does it feel like a youthful, fresh and contemporary ZestUp advertisement?

6. Product Accuracy

Check the can shape, proportions, branding, condensation and realism.

7. Lemon-Mint Integration

Do the lemon and mint elements feel intentional and connected to the product?

8. Typography Space

Is there enough clean negative space to add:

“Current Status: ZestUp.”

and the supporting copy later in Canva?

9. GenAI Quality

Identify visible AI-generation problems such as:

- distorted objects**
- unrealistic reflections**
- strange geometry**
- inconsistent product details**
- unnecessary elements**
- visual artifacts**

10. Advertising Quality

Does it look like a professional FMCG Hero KV rather than simply an AI-generated image?

Create a simple evaluation table:

Criterion | Score /5 | Observation

Then identify:

- A. 3 things that work well
- B. 3 things that need improvement
- C. The single biggest problem with V1
- D. The most important change for V2

Finally, write a short:

“V1 Learning”

explaining what this iteration taught us about using GenAI for advertising visual generation.

Do not generate Version 2 yet.
This step is only evaluation and learning.

STEP 14 — VERSION 1 HERO KV EVALUATION

Version 1 Creative Director Review

Version 1 successfully establishes the core “Status Comes to Life” idea, but it currently feels closer to a high-quality AI concept image than a fully controlled FMCG Hero KV.

The strongest aspect is the physicalisation of the digital status. The biggest issue is that the status panel and generated typography compete too strongly with the product, while the can itself needs more controlled brand/product accuracy.

Evaluation Table

Criterion	Score /5	Observation
Product Visibility	4	ZestUp can is centrally placed and clearly visible, but the status panel and ingredients compete for attention.
Campaign Communication	5	The physical status interface strongly communicates “The Status Comes to Life.”
Visual Hierarchy	3	The status panel gets attention before the product; the can should be the primary focal point.

Composition	4	Strong central composition, though the lower section feels slightly crowded.
Brand Fit	5	Fresh, youthful and contemporary; the lemon-mint palette fits ZestUp well.
Product Accuracy	3	Can looks realistic overall, but packaging and label details need refinement.
Lemon-Mint Integration	4	Flavour cues are clear, but reducing the floating ingredients would make it cleaner.
Typography Space	3	Copy space exists, but the status panel occupies much of the strongest negative space.
GenAI Quality	4	Strong generation quality overall, with minor inconsistencies in ingredients and product details.
Advertising Quality	4	Polished advertising concept that needs tighter hierarchy and cleaner art direction.
Overall	39/50	Strong concept; key improvement is creating a more product-first visual hierarchy.

A. 3 THINGS THAT WORK WELL

1. The campaign idea is immediately visible

The strongest achievement is the three-dimensional status panel.

It doesn't merely show the words "Current Status: ZestUp." It makes the digital status feel like something that has entered the physical world.

That directly translates the strategy into visual form:

Digital Status → Physical World → ZestUp

2. The product is clearly identifiable

The can is large, centrally positioned and surrounded by strong condensation.

The combination of:

cold can + water droplets + lemon + mint

immediately establishes the refreshing lemon-mint product personality.

3. It has strong GenAI experimentation value

The combination of a realistic beverage product with a translucent 3D interface, floating ingredients and controlled environmental effects demonstrates how GenAI can help visualise an advertising idea that would otherwise require significant production and compositing.

This makes the concept particularly useful for the GenAI advertising case study.

B. 3 THINGS THAT NEED IMPROVEMENT

1. The status panel is too dominant

The panel is extremely large and contains prominent generated text.

As a result, the viewer can read the status before fully registering the product.

For an FMCG Hero KV, the desired hierarchy should be:

1. ZestUp can → 2. Campaign idea → 3. Supporting copy

V1 is closer to:

1. Status text → 2. Status panel → 3. ZestUp can

2. Too many lemon, mint and water elements

The ingredients are visually attractive, but there are several floating pieces and droplets competing around the can.

The next version should use fewer, more deliberately positioned ingredients.

The lemon and mint should frame or interact with the status rather than simply decorate the scene.

3. The generated typography should not be relied upon

The AI-generated text inside the panel is surprisingly readable, but it should not become part of the final design workflow.

For the final KV, the campaign line:

Current Status: ZestUp.

should be professionally typeset in Canva/Photoshop/Figma.

The AI image should provide the visual world and clean space, not the final typography.

C. SINGLE BIGGEST PROBLEM WITH V1

The visual hierarchy is not product-first enough.

The concept is correct, but the status panel currently feels like the hero and the can feels like the object placed inside it.

For an FMCG advertisement, we want the opposite:

The ZestUp can should be the hero, and the status panel should exist to make the can feel like the physical embodiment of the status.

This is an important distinction.

D. MOST IMPORTANT CHANGE FOR V2

Reduce and simplify the status panel while making the ZestUp can more dominant.

For V2:

- Make the can slightly larger and more visually prominent.
- Keep it sharply focused.
- Reduce the size/intensity of the status panel.

- Remove unnecessary generated text from the panel.
- Create a large, genuinely clean negative-space area for typography.
- Reduce the number of floating lemon/mint pieces.
- Keep only a few highly intentional lemon and mint elements.
- Preserve the condensation and premium product-photography treatment.
- Make the status panel feel like it is emerging behind/from the product, rather than functioning as a giant billboard behind it.

The goal should be:

Product first → Status second → Ingredients third.

V1 LEARNING

Version 1 demonstrates that GenAI is very effective at translating an abstract advertising strategy into a visually tangible world, but it also shows that generation alone does not equal finished advertising design.

GenAI successfully created the difficult visual relationship between the physical ZestUp can and the three-dimensional digital status.

However, human creative direction is still required to control:

- Product hierarchy
- Brand accuracy
- Typography
- Negative space
- Ingredient placement
- Visual restraint
- Final advertising composition

Key learning:

GenAI can generate the visual idea, but human art direction must turn that idea into an advertisement.

For Version 2, the objective should therefore not be to make the image more complicated. It should be to make it cleaner, more product-led and more professionally controlled while preserving the “Status Comes to Life” concept.

VERSION 2 HERO KV DEVELOPMENT

Using the Version 1 Hero KV evaluation and the creative direction established in the previous steps, develop Version 2 of the ZestUp Status Hero Key Visual.

The core concept must remain “The Status Comes to Life” and the master campaign line remains:

“Current Status: ZestUp.”

Improve Version 1 specifically based on the following feedback:

1. Make the ZestUp can the clear visual hero and the first thing the viewer notices.
2. Make the can slightly larger, sharply focused and highly realistic.
3. Reduce the size and visual dominance of the 3D status panel.
4. Make the status panel appear to emerge behind or from the product, rather than looking like a giant billboard.
5. Reduce the number of floating lemon and mint elements.
6. Keep only a few intentional lemon slices and mint leaves that support the product rather than decorate the image excessively.
7. Preserve realistic condensation, coldness and premium FMCG product photography.
8. Create genuine clean negative space for professionally added campaign typography.
9. Do not rely on AI-generated typography inside the image. The final campaign line will be added manually later.
10. Keep the overall visual mood fresh, youthful, contemporary, premium and playful.

Recommended visual hierarchy:

1. ZestUp can → 2. Status concept → 3. Lemon & mint → 4. Supporting copy

The final visual should communicate immediately:

ZestUp + Status + Refreshing Moment

The image should feel like a polished FMCG advertisement rather than an experimental AI image.

Also explain:

- What was improved from Version 1
- How the hierarchy was corrected
- How GenAI contributed
- What still requires human editing
- Whether Version 2 is stronger than Version 1

Provide a concise Version 2 Creative Director Evaluation with a scoring table and final recommendation.

AI OUTPUT :-

FINAL HERO KV SELECTION

Using the complete ZestUp Status campaign development from Steps 1–15, including the original campaign strategy, copywriting, visual concept development, Version 1 evaluation and Version 2 Hero KV, evaluate the final Version 2 Hero KV.

Determine whether Version 2 successfully solves the problems identified in Version 1, especially:

- 1. ZestUp can must be the clear visual hero and first thing noticed.**
- 2. The “The Status Comes to Life” concept must remain immediately understandable.**
- 3. The status panel should support the product rather than overpower it.**
- 4. Lemon and mint elements should feel intentional and not overly decorative.**
- 5. The composition should have clean negative space for professionally added typography.**
- 6. The visual should feel like a polished FMCG advertisement rather than an uncontrolled AI-generated image.**
- 7. The campaign line remains:**

“Current Status: ZestUp.”

Compare Version 1 and Version 2 across:

- **Product visibility**
- **Visual hierarchy**
- **Campaign communication**
- **Brand fit**
- **Product realism**
- **Lemon-mint integration**
- **Typography space**
- **Visual impact**
- **GenAI quality**
- **Advertising readiness**

Provide:

- **A comparison table with scores out of 5**
- **What improved from Version 1 to Version 2**
- **What, if anything, still needs improvement**
- **Whether Version 2 should be selected as the final Hero KV**
- **A clear final creative recommendation**
- **A short final rationale explaining why this KV represents the ZestUp Status**

campaign

- **Final guidance for adding the campaign typography and product sign-off in Canva/Photoshop/Figma**

Do not generate a new image. Evaluate the existing Version 2 Hero KV only.

End with:

FINAL HERO KV: [Selected / Needs Further Refinement]

Campaign Line: “Current Status: ZestUp.”

AI OUTPUT :- STEP 16 — FINAL HERO KV SELECTION

Version 2 Creative Director Evaluation

Campaign: ZestUp Status

Selected Concept: The Status Comes to Life

Master Campaign Line: “Current Status: ZestUp.”

Version 2 is a clear improvement over Version 1. Most importantly, it corrects the central problem identified earlier: the ZestUp can now feels like the hero, while the status panel functions as a supporting visual device.

V1 vs V2 Comparison

Criterion	Version 1 /5	Version 2 /5	Evaluation
Product Visibility	4	5	V2 makes the can larger, sharper and more dominant.
Visual Hierarchy	3	5	V2 creates a clearer flow: can → status panel → lemon/mint.
Campaign Communication	5	5	Both clearly show the digital status entering the physical world.
Brand Fit	5	5	V2 feels fresh, contemporary, controlled and more premium.
Product Realism	3	4	V2 has stronger condensation, reflections and proportions; pack details still need checking.
Lemon-Mint Integration	4	5	V2 uses fewer ingredients more intentionally around the product.
Typography Space	3	5	V2 offers much cleaner negative space for campaign copy.
Visual Impact	4	5	Larger product and cleaner composition create stronger impact.
GenAI Quality	4	4	Both are strong overall, with minor packaging/details requiring refinement.
Advertising Readiness	4	5	V2 is much closer to a finished FMCG Hero KV.
Overall	39/50	48/50	V2 is significantly stronger and recommended as the final Hero KV.

WHAT IMPROVED FROM VERSION 1 TO VERSION 2

1. The can became the hero

This is the biggest improvement.

In V1, the status panel competed with the product. In V2, the can is:

- **Larger**
- **Sharper**
- **Centrally positioned**
- **More visually dominant**
- **Clearly separated from the background**

The viewer should now notice ZestUp first.

2. The status panel became a supporting element

V2 correctly reduces the panel's dominance.

Instead of functioning like a giant advertising billboard, it sits behind the can, making the relationship much more interesting:

ZestUp can → status appears behind it → status comes to life

This is much closer to the original strategic idea.

3. Lemon and mint are more controlled

V1 had many floating ingredients and droplets.

V2 uses fewer elements and places them closer to the product. The lemon slice and mint leaves now work more as product cues than decoration.

4. Typography space is significantly better

V2 deliberately leaves a clean, bright area on the upper-left side.

This is particularly important because the campaign typography should be added manually rather than generated inside the image.

The visual can therefore accommodate:

Current Status: ZestUp.

followed by:

A refreshing lemon-mint break for wherever the day takes you.

without fighting the product.

5. It feels more like advertising

V1 had a slightly “AI concept art” quality because there was a lot happening simultaneously.

V2 has more restraint.

The composition now feels closer to a premium FMCG product advertisement, while still retaining the GenAI-driven surreal element that makes the case study interesting.

WHAT STILL NEEDS IMPROVEMENT

Version 2 is strong enough to move forward, but I would still make a few finishing-level corrections before calling it production-final.

1. Check the product packaging carefully

The AI-generated can is convincing, but the exact logo, lettering and small packaging details should be checked against the intended ZestUp artwork.

Recommendation: Replace/retouch the generated can artwork with a clean master product render if available.

2. Keep the status panel subtle

The panel is much better in V2, but it should remain a supporting visual device.

Do not add large amounts of additional UI graphics during the design stage.

The campaign line itself should provide the primary communication.

3. Maintain the negative space

Do not fill the clean upper-left area with decorative graphics.

That space is one of V2's biggest strengths because it gives the designer room for the campaign typography.

SHOULD VERSION 2 BE SELECTED AS THE FINAL HERO KV?

YES.

Version 2 successfully addresses the major problems identified in Version 1 without changing the campaign concept.

It retains:

The Status Comes to Life

while improving:

Product dominance + hierarchy + simplicity + typography space + FMCG polish.

I would therefore select Version 2 as the final Hero KV, subject to final human design and product-retouching checks.

FINAL CREATIVE RECOMMENDATION

Select Version 2 and move into the final design/artwork stage.

Do not generate another completely different visual.

The conceptual problem has been solved.

The remaining work is art direction and finishing, not another round of ideation.

The final design should preserve this hierarchy:

1. ZestUp can
 2. Status Comes to Life
 3. Lemon + Mint
 4. Campaign typography
-

WHY THIS KV REPRESENTS ZESTUP STATUS

The visual successfully turns an abstract strategic thought into something immediately visible.

The campaign idea is:

ZestUp becomes someone's current status.

The Hero KV shows that idea literally:

A real ZestUp can exists in the physical world, while a digital status interface emerges behind it.

This creates a simple visual equation:

DIGITAL STATUS

↓

COMES TO LIFE

↓

ZESTUP

That is why the visual belongs specifically to ZestUp Status, rather than being a generic lemon-mint beverage advertisement.

FINAL TYPOGRAPHY GUIDANCE

The AI-generated image should not be treated as the finished artwork.

Add the typography manually in Canva, Photoshop or Figma.

1. Campaign Headline

Place in the clean upper-left negative space:

Current Status: ZestUp.

Use a bold, contemporary sans-serif typeface.

Keep it large enough to be immediately readable but smaller than the visual dominance of the can.

2. Supporting Copy

Place directly underneath:

A refreshing lemon-mint break for wherever the day takes you.

Use a smaller, lighter-weight font.

Keep the line length controlled so it doesn't stretch across the entire visual.

3. Product Sign-off

Position near the lower-left or lower-right area, depending on the final layout:

ZestUp — Lemon Mint Energy Drink

Keep this visually subordinate to the campaign line.

4. Do Not Add

Avoid adding:

- Extra UI notifications
- Social-media logos
- Excessive icons

- Additional slogans
- Large decorative text
- Unnecessary ingredient labels

The image already has enough visual storytelling.

FINAL CREATIVE VERDICT

Version 1 proved the concept.

Version 2 turns the concept into an advertisement.

The most important improvement is that the ZestUp can is now unmistakably the hero, while the status panel supports the campaign rather than competing with it.

The remaining work is primarily human design judgment, product accuracy, typography and final retouching.

FINAL HERO KV: Selected

Campaign Line: “Current Status: ZestUp.”

FINAL HERO KV

Campaign: ZestUp Status

Master Campaign Line: “Current Status: ZestUp.”

Selected Concept: The Status Comes to Life

Final Version: Version 2 — Polished Hero KV

Key Learnings an Gen AI advertising intern

Key Learnings as a GenAI Advertising Intern

Through this project, I gained practical experience in using Generative AI as part of the advertising creative process. My key learnings were:

- **Structured Prompting:** Clear and detailed prompts produce more relevant and usable creative outputs.
- **AI-Assisted Ideation:** GenAI can quickly generate multiple campaign directions, but human judgment is essential for selecting the strongest idea.
- **Copywriting Exploration:** AI is useful for exploring headlines, campaign lines and social-media copy, while final refinement requires human understanding of brand tone and audience.
- **Visual Development:** GenAI can rapidly visualize advertising concepts and Key Visuals, making it easier to explore different compositions and creative directions.
- **Creative Evaluation:** AI-generated work should be critically evaluated for brand fit, product accuracy, visual hierarchy, communication and advertising quality.
- **Iteration & Refinement:** The first AI output is rarely the final output. A **Generate → Evaluate → Refine → Regenerate** process leads to stronger results.
- **Importance of Human Art Direction:** Product accuracy, typography, composition, brand consistency and final creative decisions still require human intervention.
- **AI as a Creative Tool:** My biggest learning was that GenAI works best as a **creative assistant rather than a replacement for human creativity**, helping make the advertising process faster, more exploratory and iterative.
